**The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity **The Lever of Riches** with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential **Squaring Off** W. J. Weatherby, 1977-03-01 James Baldwin's Turkish Decade Magdalena J.

Zaborowska, 2009-01-16 Between 1961 and 1971 James Baldwin spent extended periods of time in Turkey where he worked on some of his most important books In this first in depth exploration of Baldwin's Turkish decade Magdalena J Zaborowska reveals the significant role that Turkish locales cultures and friends played in Baldwin's life and thought Turkey was a nurturing space for the author who by 1961 had spent nearly ten years in France and Western Europe and failed to reestablish permanent residency in the United States Zaborowska demonstrates how Baldwin's Turkish sojourns enabled him to re-imagine himself as a black queer writer and to revise his views of American identity and U S race relations as the 1960s drew to a close Following Baldwin's footsteps through Istanbul Ankara and Bodrum Zaborowska presents many never published photographs new information from Turkish archives and original interviews with Turkish artists and intellectuals

who knew Baldwin and collaborated with him on a play that he directed in 1969 She analyzes the effect of his experiences on his novel *Another Country* 1962 and on two volumes of his essays *The Fire Next Time* 1963 and *No Name in the Street* 1972 and she explains how Baldwin's time in Turkey informed his ambivalent relationship to New York his responses to the American South and his decision to settle in southern France James Baldwin's *Turkish Decade* expands the knowledge of Baldwin's role as a transnational African American intellectual casts new light on his later works and suggests ways of reassessing his earlier writing in relation to ideas of exile and migration *James Baldwin's God* Clarence E. Hardy, 2003 James Baldwin's relationship with black Christianity and especially his rejection of it exposes the anatomy of a religious heritage that has not been wrestled with sufficiently in black theological and religious studies In *James Baldwin's God Sex Hope and Crisis in Black Holiness Culture* Clarence Hardy demonstrates that Baldwin is important not only for the ways he is connected to black religious culture but also for the ways he chooses to disconnect himself from it Despite Baldwin's view that black religious expression harbors a sensibility that is often vengeful and that its actual content is composed of illusory promises and empty theatrics he remains captive to its energies rhythms languages and themes Baldwin is forced on occasion to acknowledge that the religious fervor he saw as an adolescent was not simply an expression of repressed sexual tension but also a sign of the irrepressible vigor and dignified humanity of black life Hardy's reading of Baldwin's texts with its goal of understanding Baldwin's attitude toward a religion that revolves around an uncaring God in the face of black suffering provides provocative reading for scholars of religion literature and history The Author Clarence Hardy is an assistant professor of religion at Dartmouth College His articles have appeared in the *Journal of Religion and Christianity and Crisis* *New Essays on Go Tell It on the Mountain* Trudier Harris, 1996-03-29 A collection of critical essays on James Baldwin's *Go Tell It on the Mountain* *Critical Essays on American Literature* K.
