## **Telecommunications Policy And Management:**

Office of Telecommunications Policy Overview United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Communications, 1975 *Telecommunications Structure and Management in the Executive Branch of Government 1900-1970* Thomas E. Will, 2019-07-16 In early 1970 President Richard M Nixon created a new executive office the Office of Telecommunications Policy OTP and appointed Dr Clay T Whitehead as OTP's first director Whitehead had previously been on the staff of Peter Flanigan a presidential assistant responsible for telecommunications policy at the White House. What was the motivation behind this action? Were political interests being served? With what results? Thomas Will believes that these and other questions must be raised in view of the history of the Nixon administration. In an attempt to answer them he examines the development of telecommunications policy in the executive branch from 1900 to 1970. Dr Will reviews the early executive branch involvement in radio telecommunications the Radio Act of 1927 and the Communications Act of 1934 the technological advance of radio telecommunications and its effect on the executive branch before and after World War II the appointments of telecommunications advisors to presidents from 1951 to 1967 and the creation of the President's Task Force in 1967 to deal with the problems created by an inherently limited radio spectrum. He traces the steps taken to create the OTP and analyzes the extent to which the office reflected a traditional progression of executive branch telecommunications authority. His study and conclusions are directly and essentially relevant to the current debate on telecommunications policy.

**Telecommunications Regulation** Véronique Wavre, 2018-01-22 This study investigates regulatory reforms in the telecommunications sector of Middle Eastern and North African MENA countries. It explores telecommunications innovations in three developing economies Morocco, Jordan and Egypt with a focus on regional and European trends in telecommunications policies. Common knowledge suggests that the European Union and its member states are the main influential regulatory power in the MENA region. However, the empirical analysis of selected telecommunications regulations universal service obligation USO and spectrum management reveals that reforms are not always determined by European countries but may also originate from other developing countries such as Peru and Chile. This finding attests to the rise of regulatory influence from the Global South which challenges traditional transfers of regulations originating from more industrially advanced countries. **Telecommunications Policy and Regulation**, 1993 Telecommunication Structure
