Services of General Interest Beyond the Single Market

Markus Krajewski,2015-06-23 This is the first book ever to assess comprehensively the impact of EU international agreements on services of general interest Services of general interest remain high on the political and legal agenda of the European Union However the debates about the impact of EU law on services of general interest usually focus on internal market law such as the free movement of services competition law state aid rules and the law of public procurement The external and international dimensions of the European legal framework for services of general interest are often overlooked This book addresses the impact of international trade and investment agreements on public services and the role these services play in EU external relations It shows that the inherent tension between establishing and securing undistorted competition on markets and the logic of public services exists in international economic law in a similar way as in EU internal law Given the contentiousness of international trade and investment agreements as well as the EU's external policies the issues discussed in this volume are timely and relevant and contribute to the ongoing debate about the future of services of general interest in the EU with fresh ideas and perspectives Markus Krajewski is Professor of Public and International Law at the University of Erlangen Nuremberg Germany [An Application of Arbitrage Pricing Theory to Futures Markets](#) Bharat K. Malinak, Ralph August Walkling, WanSoo T. Rhee, 1987 *Developments in Services of General Interest* Erika Szyszczak, Jim Davies, Mads Andenæs, Tarjei Bekkedal, 2011-05-18 This is the third book in the series Legal Issues of Services of General Interest. The book focuses upon a set of research questions on the recent developments in the emergence of services of general interest SGIs as a distinct EU concept. This includes *inter alia* the emergence of universal service obligations and the way they are regulated in the EU in primary and secondary law, the range of soft law communications adopted by the Commission to create a distinctive EU concept of SGIs, the residual role of hard law in the Treaty on the Functioning of the European Union TFEU, the special problems created by Social Services of General Economic Interest and the interaction of procurement and state aid law with SGIs. A new perspective is offered in this book some of the issues faced by the EU in accommodating SGIs into a regulatory framework are found also in the policy of the WTO and in least developed countries LDCs

ICTs for Mobile and Ubiquitous Urban Infrastructures: Surveillance, Locative Media and Global Networks Firmino, Rodrigo J., Duarte, Fabio, Ultramari, Clovis, 2010-10-31 This book investigates how a shift to a completely urban global world woven together by ubiquitous and mobile ICTs changes the ontological meaning of space and how the use of these technologies challenges the social and political construction of territories and the cultural appropriation of places. Telecommunications in Western Asia and the Middle East Eli M. Noam, 1997 Bringing together experts on West Asian and Middle Eastern countries and providing a comprehensive view of what individual countries are doing to build a telecommunications capability. *Telecommunications in West Asia* addresses the complicated economic and policy issues of each country's telecommunications sector. The editor and his staff have skillfully integrated the contributors' chapters into a coherent volume keeping the information accessible to nonspecialists. Particular attention is paid to telecommunications as a link in the chain of the regional development process. This study will be of interest to students and professionals in the areas of communications, international telecommunications companies and country governments in Western Asia

New Books in the Communications Library University of Illinois at Urbana-Champaign. Communications Library, 1991 *Annual Review of Information Science & Technology* Blaise Cronin, 2006-10 ARIST published annually since 1966 is a landmark publication within the information science community. It surveys the landscape of information science and technology providing an analytical, authoritative and accessible overview of recent trends and significant developments. The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives. While ARIST continues to cover key topics associated with classical information science e.g. bibliometrics, information retrieval, editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities
