public good and a model of industrial organization to identify the major forces determining the nature of the television product in the late twentieth century The forces of supply and demand for an unusual product often requiring a double sale to a consumer and to an advertiser are examined as are alternative methods of financing The all pervading role of government is discussed at length *Television in Black-and-white America* Alan Nadel,2005 La couverture indique Alan Nadel s new book reminds us that most of the images on early TV were decidedly Caucasian and directed at predominantly white audiences Television did not invent whiteness for America but it did reinforce it as the norm particularly during the Cold War years Nadel now shows just how instrumental it was in constructing a narrow conservative and very white vision of America During this era prime time TV was dominated by adult Westerns with heroes like The Rebel s Johnny Yuma reincarnating Southern values and Bonanza s Cartwright family reinforcing the notion of white patriarchy programs that Nadel shows bristled with Cold War messages even as they spoke to the nation s mythology America had become visually reconfigured as a vast Ponderosa crisscrossed by concrete highways designed to carry suburban white drivers beyond the moral challenge of racism racial poverty and increasingly vocal civil rights demands The Economic Regulation of Broadcasting Markets Paul Seabright,Jürgen von Hagen,2007-04-26 New technology is revolutionizing broadcasting markets As the cost of bandwidth processing and delivery fall information intensive services that once bore little economic relationship to each other are now increasingly related as substitutes or complements Television newspapers telecoms and the internet compete ever more fiercely for audience attention At the same time digital encoding makes it possible to charge prices for content that had previously been broadcast for free This is creating new markets where none existed before How should public policy respond Will competition lead to better services higher quality and more consumer choice or to a proliferation of low quality channels Will it lead to dominance of the market by a few powerful media conglomerates Using the insights of modern microeconomics this book provides a state of the art analysis of these and other issues by investigating the power of regulation to shape and control broadcasting markets **The economics of television** C. F.
