Single Parents By Choice Naomi Miller, 1992-08-21 These new family constellations involve the following four separate groups: single biological mothers, single adoptive mothers or fathers including those who have adopted older children as well as infants, divorced parents i.e. the active parent who has decided not to remarry, and gay and lesbian parents, a relatively new category of alternative parenting. Listening to the poignant stories of those who have chosen single parenthood, we learn about their family backgrounds and how these played a significant role in shaping the hopes and aspirations for creating their own families. We hear about their ambitions, social lives, and love relationships, and what ultimately led them to decide to take on the responsibilities of parenthood outside the bonds of marriage.

Fathering, Fact Or Fable? Edward V. Stein, 1977

The Changing American Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns. As a result, the real rural America remains much misunderstood, neglected, or ignored by scholars and policymakers alike. In response, Emery Castle offers *The Changing American Countryside*, a volume that will forever change how we look at this important subject. Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands. These authors examine the role of non-metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty, industry, the environment, education, family, social problems, ethnicity, race, religion, gender, government, public policy, and regional diversity. The authors are especially effective in demonstrating why rural America is so much more than just agriculture. It is, in fact, highly diverse, complex, and interdependent with urban America and the international marketplace. Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections. To do so is misguided and even hazardous when one-fourth of our population and ninety-seven per cent of our land area is rural. Together, these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life.
