Spring Breakup:

Disinfection By-Products in Water Treatment **The Chemistry of Their Formation and Control** Roger A. Minear, Gary Amy, 2017-11-22 Disinfection By Products in Water Treatment describes new government regulations related to disinfection by products. It explains the formation of microorganism by products during water treatment and the methods employed to control them. The book includes several chapters on chlorine by products and discusses techniques for the removal of chloroform from drinking water. It also describes gamma radiation techniques for removing microorganic by product precursors from natural waters and the removal of bromate from drinking water. [Arctic Hydrology, Permafrost and Ecosystems](#) Daqing Yang, Douglas L. Kane, 2020-08-28 This book provides a comprehensive up to date assessment of the key terrestrial components of the Arctic system i e its hydrology, permafrost and ecology drawing on the latest research results from across the circumpolar regions. The Arctic is an integrated system the elements of which are closely linked by the atmosphere, ocean and land. Using an integrated system approach the book's 30 chapters written by a diverse team of leading scholars carefully examine Arctic climate variability, change, large river hydrology, lakes and wetlands, snow cover and ice processes, permafrost characteristics, vegetation, landscape changes and the future trajectory of Arctic system evolution. The discussions cover the fundamental features of and processes in the Arctic system with a special focus on critical knowledge gaps i e the interactions and feedbacks between water, permafrost and ecosystem such as snow pack and permafrost changes and their impacts on basin hydrology and ecology, river flow, geochemistry and energy fluxes to the Arctic Ocean and the structure and function of the Arctic ecosystem in response to past future changes in climate, hydrology and permafrost conditions. Given its scope the book offers a valuable resource for researchers, graduate students, environmentalists, managers and administrators who are concerned with the northern environment and resources.

Water-resources Investigations Report, 2002 [*Evaluation of Factors Affecting Ice Forces at Selected Bridges in South Dakota*](#) Colin A. Niehus, 2002 **Handbook of Climate Change Impacts on River Basin Management** Saeid Eslamian, Mir Bintul Huda, Nasir Ahmad Rather, Faezeh A. Eslamian, 2024-08-29 Climate change not only involves rising temperatures but it can also alter the hydro meteorological parameters of a region and the corresponding changes emerging in the various biotic or abiotic environmental features. One of the results of climate change has been the impact on the sediment yield and its transport. These changes have implications for various other environmental components particularly soils, water bodies, water quality, land productivity, sedimentation processes, glacier dynamics and risk management strategies to name a few. This volume presents a diverse collection of case studies from researchers across the globe examining the impacts of climate change on river basin management in various geographical, hydrological and socioeconomic contexts. The case studies yield important insights that can inform strategies to build resilience and adapt river basins to a changing climate. **Proceedings of a Synthesis Meeting**, 1981 Relates to U S Dept of the Interior's proposed sale 71 the second
