Officer's Guide to Operating and Surviving in Low-light and No-light Conditions Tony L. Jones,2002 This book reminds the
reader that many police shootings occur during diminished light and with few exceptions officers do not receive enough
training in these conditions in addition recommendations are made for officers to use senses other than vision teamwork and
technological innovations to increase an officer s chance of success when working in dim light or no light conditions The
majority of crimes and officer shootings occur at night in diminished light or no light settings The Federal Bureau of
Investigation reports that during a 9 year period 1985 1994 almost 63 percent of police officer deaths occurred between 6 00
p m and 6 00 a m During these hours it is difficult for officers to accurately identify an alleged suspect s face easily or
identify any weapons he or she may be in possession of Add stress and an increased heart rate to an already tense situation
and it is easy to understand the need for additional training under these conditions The dark is fraught with peril and danger
but increased training can alleviate stress and increase proficiency Moreover officers can rely upon other senses and
additional training can help facilitate decision making under these difficult circumstances Technological advances and team
techniques can also be incorporated into officer training Directional microphones night vision and thermal imaging devices
and infrared lights are a few of the technological advances that may aid officer shootings during dim light or no light
environments Consumer Sourcebook Paul Wasserman,Jean Morgan,1978 **Fiction Catalog** H.W. Wilson
