Memphis, Dr. Xiangen Hu, University of Memphis, Dr. Benjamin Goldberg, US Army Research Laboratory, 2014-07-01 Design Recommendations for Intelligent Tutoring Systems explores the impact of intelligent tutoring system design on education and training. Specifically, this volume examines Instructional Management techniques, strategies, and tactics and identifies best practices, emerging concepts, and future needs to promote efficient and effective adaptive tutoring solutions. Design recommendations include current, projected, and emerging capabilities within the Generalized Intelligent Framework for Tutoring (GIFT), an open source modular service-oriented architecture developed to promote simplified authoring, reuse, standardization, automated instructional management, and analysis of tutoring technologies. Problem solving and reasoning are students' processes of actively applying what they know to new problems from diverse areas of mathematics. Knowing a variety of mathematical ideas is insufficient unless students can draw on, integrate, and use them to solve challenging complex problems. The *Navigating through Problem Solving and Reasoning* books for grades 3-6 present hands-on investigations that nurture reasoning and problem-solving strategies in each of the upper elementary grades. In lively and challenging investigations for grade 6 students, there are opportunities to reason about parts of a whole, analyse patterns of growth, discover area formulas for familiar shapes, explore scale factors and similar figures, and analyse a set of data to solve a real-world problem, how to arrange competitors in teams for an athletic festival. Students apply mathematical ideas from the five main content areas: number, algebra, geometry, measurement, and data analysis. As they work, they infer, generalise, reason by analogy, recognise relationships, and make representations, and they also predict, check, and revise and verify their results. Includes a supplemental CD-ROM that features applets for students' use and resources for teachers' professional development. TOPS C. Greenes, Seymour (Dale) Publications, TOPS C.
