Taxi Mortal:

Teach Like a Human David J. Mulder, 2025-09-18 Are the machines taking over Artificial intelligence suddenly seems to be everywhere including in the world of education With new AI powered tools popping up every day it s no wonder that educators might feel overwhelmed How can we navigate the strange new world of AI without losing our humanity or our sense of humor Blending thoughtful theology practical wisdom and a deep love for teaching this book invites educators to reflect on big questions What does it mean to be a real human in an age of artificial intelligence What tools should we adopt and which ones should we avoid and how can we decide How do we stay grounded in the gospel story while adapting to emerging technologies Rather than offering easy answers or alarmist warnings let s consider an approach that is curious and courageous developing a hopeful vision for education that forms both minds and hearts Standing on the truth of Scripture and keeping a finger on the tech pulse this book helps Christian educators practice thinking faithfully acting ethically and teaching joyfully even when algorithms are everywhere Teaching Christianly with technology isn t about keeping up with the latest tools and trends it s about being the humans God created us to be

Human Error, Safety and Systems

Development Philippe Palanque, Chris Johnson, 2006-04-11 Recent accidents in a range of industries have increased concern over the design development management and control of safety critical systems Attention has now focused upon the role of human error both in the development and in the operation of complex processes Human Error Safety and Systems Development gathers contributions from practitioners and researchers presenting and discussing leading edge techniques that can be used to mitigate the impact of error both system and human on safety critical systems Some of these contributions can be easily integrated into existing systems engineering practices while others provide a more theoretical and fundamental perspective on the issues raised by these kinds of interactive systems More precisely the contributions cover the following themes Techniques for incident and accident analysis Empirical studies of operator behaviour in safety critical systems Observational studies of safety critical systems Risk assessment techniques for interactive systems Safety related interface design development and testing Formal description techniques for the design and development of safety critical interactive systems Many diverse sectors are covered including but not limited to aviation maritime and the other transportation industries the healthcare industry process and power generation and military applications This volume contains 20 original and significant contributions addressing these critical questions The papers were presented at the 7th IFIP Working Group 13.5 Working Conference on Human Error Safety and Systems Development which was held in August 2004 in conjunction with the 18th IFIP World Computer Congress in Toulouse France and sponsored by the International Federation for Information Processing IFIP
