Internet Costs and Cost Models for Public Libraries Charles R. McClure, John Carlo Bertot, John C. Beachboard, United States. National Commission on Libraries and Information Science, 1995 This report is the result of the statutory mandate by the National Commission on Libraries and Information Science NCLIS to promote activities to extend the nation's library and information handling capability as essential links in the emerging global information infrastructure In a study to inventory the challenges related to libraries roles in the National Information Infrastructure NII it was discovered that libraries had difficulty identifying and describing specific Internet costs The cost elements models and worksheets presented here are intended to serve as useful guides for public libraries and communities in planning Internet connections and services Five representative connectivity models and seven broad cost categories are identified for use by public libraries planning Internet connectivity and services The value of this study rests more with the development of cost models worksheets and cost categories than with the costs represented in this report However the representative costs illustrate the significant variations that are possible in planning the networking permutations and configuration available to the public library community For example an initial one time cost of 1 475 and a recurring annual cost of 12 635 a public library can establish a minimal level of single workstation text based Internet connection A more sophisticated representative multimedia connectivity model is described involving multiple workstations at multiple locations for a one time cost of 266 375 and a recurring annual cost of 154 220 indicating the wide variation in cost and connectivity possibilities The findings are intended to provide a basis for extending the benefits of advanced information services to the nation through its 9 050 public libraries Models are illustrated through 14 figures Two appendices provide research methodology and glossary of Internet terms Contains 14 references Author MAS
