Second Thousand* Robert DUNNING (and HASSELL (Joseph)),1871 Handbook of Early Childhood Education Robert C. Pianta,Susan M. Sheridan,2015-08-12 Comprehensive and authoritative this forward thinking book reviews the breadth of current knowledge about early education and identifies important priorities for practice and policy Robert C Pianta and his associates bring together foremost experts to examine what works in promoting all children s school readiness and social emotional development in preschool and the primary grades Exemplary programs instructional practices and professional development initiatives and the systems needed to put them into place are described The volume presents cutting edge findings on the family and social context of early education and explores ways to strengthen collaboration between professionals and parents Factory Children George Edwin McNeill,1875 The Culture of Child Care Kay E. Sanders,Alison Wishard Guerra,2016-03-09 As societies are experiencing increasing levels of immigration from contexts outside of the Western industrialized world child care programs are experiencing simultaneously increasing diversity in enrollment A question that has been raised by early childhood advocates and practitioners is whether the former articulations regarding definitions of quality models of relationships and peer relations in the child care context are accurate and relevant within the increasing racial linguistic and ethnic diversity of the United States The Culture of Child Care provides a much needed integration of research pertaining to crucial aspects of early childhood development attachment in non familial contexts peer relations among ethnically and linguistically diverse children and the developmental importance of child care contexts during early childhood This volume highlights the interconnections between these three distinct bodies of research and crosses disciplinary boundaries by linking psychological and educational theories to the improvement of young children s development and experiences within child care The importance of cultural diversity in early childhood is widely acknowledged and discussed but up until now there has been little substantive work with a cultural focus on today s educational and early child care settings This innovative volume will be a unique resource for a wide range of early childhood professionals including basic and applied developmental researchers early childhood educators and advocates and policymakers Teachers Tell It--like it Is, Like it Should be Gordon A. Pedagogy course EDUCATION language English abstract Children are generally believed to be the future of any nation and their proper development is of significance to a healthy nation However the situation of our street children in Zambia is a source of concern as numbers of unsupervised children taking to the streets seem to continuously grow The trend on the major streets of Lusaka has seen increasing numbers of children leading visually impaired parents begging for alms children cleaning cars for alms and those literally begging for alms and left over food Such a saddening phenomenon is worth researching about as the youngest children are ranging from five to six years in age The diet of these children is of great concern here They eat anything they can lay their hands on as long as it is food without proper guidance from responsible adults These children are supposed to be at home or in school and eating healthy to keep them away from the streets This paper uses an exploratory approach to inductively explain the case of children s health and nutrition on their Education Specific focus is on the Street Kids as children that should not be left behind Qualitative research methodologies will be employed to collect in depth data that will then be analysed thematically
