When Chemistry Meets Biology - Generating Innovative Concepts, Methods and Tools for Scientific Discovery in the Plant Sciences Erich Kombrink, Markus Kaiser, 2016-08-12 Biologically active small molecules have increasingly been applied in plant biology to dissect and understand biological systems. This is evident from the frequent use of potent and selective inhibitors of enzymes or other biological processes such as transcription, translation or protein degradation. In contrast to animal systems which are nurtured from drug research, the systematic development of novel bioactive small molecules as research tools for plant systems is a largely underexplored research area. This is surprising since bioactive small molecules bear great potential for generating new powerful tools for dissecting diverse biological processes. In particular, when small molecules are integrated into genetic strategies, thereby defining chemical genetics, they may help to circumvent inherent problems of classical forward genetics. There are now clear examples of important fundamental discoveries originating from plant chemical genetics that demonstrate the power but not yet fully exploited potential of this experimental approach. These include the unraveling of molecular mechanisms and critical steps in hormone signaling, activation of defense reactions and dynamic intracellular processes. The intention of this Research Topic of *Frontiers in Plant Physiology* is to summarize the current status of research at the interface between chemistry and biology and to identify future research challenges. The research topic covers diverse aspects of plant chemical biology, including the identification of bioactive small molecules through screening processes from chemical libraries and natural sources which rely on robust and quantitative high-throughput bioassays, the critical evaluation and characterization of the compound's activity, selectivity and ultimately the identification of its protein targets and mode of action, which is yet the biggest challenge of all. Such well characterized selective chemicals are attractive tools for basic research, allowing the functional dissection of plant signaling processes or for applied purposes if designed for protection of crop plants from disease. New methods and data mining tools for assessing the bioactivity profile of compounds, exploring the chemical space for structure-function relationships and comprehensive chemical fingerprinting

metabolomics are also important strategies in plant chemical biology In addition there is a continuing need for diverse target specific bioprobes that help profiling enzymatic activities or selectively label protein complexes or cellular compartments To achieve these goals and to add suitable probes and methods to the experimental toolbox plant biologists need to closely cooperate with synthetic chemists The development of such tailored chemicals that beyond application in basic research can modify traits of crop plants or target specific classes of weeds or pests by collaboration of applied and academic research groups may provide a bright future for plant chemical biology The current Research Topic covers the breadth of the field by presenting original research articles methods papers reviews perspectives and opinions **Chemical Sciences** Young Gun Ko,Yuichi Kamiya,Pranut Potiyaraj,Anna Artati,Judeh Zaher,Bambang Purwono,Mardiana Binti Saaid,Dwi Siswanta,Roto Roto,Muhammad Idham Darussalam Mardjan,2022-07-18 Selected peer reviewed extended articles based on abstracts presented at the 4th International Conference on Chemical Science ICCS 2021 Aggregated Book American Druggists' Circular and Chemical Gazette ,1883 **American Gas-light Journal and Chemical Repertory** ,1889 **The Druggists' Circular and Chemical Gazette** ,1890 Includes Red book price list section title varies slightly issued semiannually 1897 1906 Journal of the Chemical Society Chemical Society (Great Britain),1900 **Journal of the Society of Chemical Industry** Society of Chemical Industry (Great Britain),1898 Includes list of members 1882 1902 and proceedings of the annual meetings and various supplements **Journal of Physical & Colloid Chemistry** Wilder Dwight Bancroft,1929 **Chemical News and Journal of Industrial Science** ,1899
