Sharma, 2012 In this edition efforts have been made to assist readers in converting data into useful information that can be used by decision makers in making more thoughtful information based decisions *Faith Is for Weak People* Ray Comfort, 2019-04-30 Every day that we interact with the world we are in a battle At stake is the eternal destiny of the souls of our friends family members and coworkers It is a battle we wage not only in prayer but also in words When we are faced with objections to the faith we profess are we ready to respond Apologist and evangelist Ray Comfort has spent his entire career answering objections to the faith and he wants you to be equipped to do the same In this practical book he shows you how to answer 20 objections to Christianity including questions such as What physical proof is there that God even exists Why does a loving God threaten eternal torture for not believing in him If there s an all powerful God why is the world so out of control Don t go into battle unarmed Let Ray Comfort train you to be ready with an answer not so you can be right but so you can help bring people from darkness into light The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within
