Simply Baking Sybil Kapoor,2013-12-18 Baking is one of life's great pleasures and in this beautiful new National Trust cookery book Sybil Kapoor brings together an inspiring collection of baking recipes both sweet and savoury. She delves into our kitchen gardens, larders, hedgerows and orchards to illustrate different aspects of modern British baking. She shows how key ingredients such as produce from the orchard, grain from the mill or butter from the dairy have shaped British baking and led to a delicious and deservedly famous repertoire of cakes, pastries, savoury bakes and bread. Seville Orange Crunch Cake and Blackcurrant Meringue Pie are just a few of the simple cakes and tarts that can be prepared with fresh dairy ingredients, while pastry and breads from the mill provide a wholesome basis for Nectarine Slice and Olive and Onion scones. Harvest sumptuous apricots, cherries, pears and plums from the orchard for Apricot Creams and Chocolate pear cake or use the natural abundance of wild herbs, mushrooms and nuts of the hedgerow to produce delicious almond blackberry cake or soft hazelnut macaroons. Sybil's interests in nature and the use of seasonal and local produce reflect the National Trust's current food policy and combine to make this a unique and exciting baking book for our times.

The Oxford Companion to Food Alan Davidson,2006-09-21 The Oxford Companion to Food by Alan Davidson first published in 1999 became almost overnight an immense success winning prizes and accolades around the world. Its combination of serious food history, culinary expertise and entertaining serendipity with each page offering an infinity of perspectives was recognized as unique. The study of food and food history is a new discipline but one that has developed exponentially in the last twenty years. There are now university departments, international societies, learned journals and a wide-ranging literature exploring the meaning of food in the daily lives of people around the world and seeking to introduce food and the process of nourishment into our understanding of almost every compartment of human life, whether politics, high culture, street life, agriculture or life and death issues such as conflict and war. The great quality of this Companion is the way it includes both an exhaustive catalogue of the foods that nourish humankind, whether they be fruit from tropical forests, mosses scraped from adamantine granite in Siberian wastes or body parts such as eyeballs and testicles, and a richly allusive commentary on the culture of food, whether expressed in literature and cookery books or as dishes peculiar to a country or community. The new edition has not sought to dim the brilliance of Davidson's prose. Rather, it has updated to keep ahead of a fast-moving area and has taken the opportunity to alert readers to new avenues in food studies.
