Spinal Injury:

Spinal Cord Injury Vladimír Beneš, 1968

Management of Spinal Cord Injuries Lisa Harvey, 2007-12-27

Combining 25 years of clinical research and teaching experience Dr Lisa Harvey provides an innovative 5 step approach to the physiotherapy management of people with spinal cord injury. Based on the International Classification of Functioning this approach emphasises the importance of setting goals which are purposeful and meaningful to the patient. These goals are related to performance of motor tasks analysed in terms of 6 key impairments. The assessment and treatment performance of each of these impairments for people with spinal cord injury is described in the following chapters: training motor tasks, strength training, contracture management, pain management, respiratory management, cardiovascular fitness training. Dr Harvey develops readers' problem solving skills equipping them to manage all types of spinal cord injuries. Central to these skills is an understanding of how people with different patterns of paralysis perform motor tasks and the importance of different muscles for motor tasks such as transfers and bed mobility of people, wheelchair mobility, hand function for people with tetraplegia, standing and walking with lower limb paralysis. This book is for students and junior physiotherapists with little or no experience in the area of spinal cord injury but with a general understanding of the principles of physiotherapy. It is also a useful tool for experienced clinicians including those keen to explore the evidence base that supports different physiotherapy interventions.

ISCoS Textbook on Comprehensive management of Spinal Cord Injuries Harvinder Singh Chhabra, 2015-01-01. SCI needs management by a team comprising of doctors, physiotherapists, occupational therapists, nurses, vocational counsellor, psychologist, assistive technologist, orthotist and social worker. Since the available textbooks did not address the requirements of all disciplines the need for the proposed textbook was reinforced.

On concussion of the spine, nervous shock and other obscure injuries to the nervous system in their clinical and medico-legal aspects John Eric Erichsen, 1883

Injuries of the spine and spinal cord without apparent mechanical lesion, and nervous shock Herbert W. Page, 1883

Injuries of the Spine & Spinal Cord Without Apparent Mechanical Lesion, & Nervous Shock, in Their Surgical & Medico-legal Aspects Herbert William Page, 1883

Spinal Trauma Eric D. Schwartz, Adam E. Flanders, 2007

Written by recognized experts this volume is a comprehensive reference on the use of advanced imaging techniques in the diagnosis and management of spinal trauma. In one cohesive source the book brings together information on state of the art clinical imaging including multidetector CT and high field MRI techniques and the pathophysiology, neurologic evaluation, medical management, surgical treatment and postoperative assessment of spine trauma and spinal cord injury. Also included are cutting edge reviews of experimental imaging techniques and their applications and experimental therapies such as neurotransplantation. More than 700 illustrations including 180 in full color complement the text.
