**The Story of Human Spiritual Evolution** Richard Ferguson, 2012-10 This book is one of a kind It traces the history of human awareness of God and belief back to its earliest roots long before the Bible the Koran the Upanishads and other writings It shows how the foundation for belief in God was contained within the instant of creation itself Scientists call this the big bang It shows that as the universe developed there came a point in human development where we had the capability to begin to be aware of an afterlife These ideas were primitive by our standards today but they served to create a solid foundation for increasing complex and more thorough understandings of who God is and our relationship with Him This book covers the well known axial age where there was a watershed or flood of prophets and holy men who advanced understandings of both philosophy and theology and science in the hundreds of years before the coming of Jesus Christ In a real sense they prepared the way for God's son and His gospel It is these men who changed the course of human understanding of God with new revolutionary ideas that advanced the self revelation of God to humankind The last part of the book looks at religion today and how we got here and ends with God's view of humanity as we constantly strive toward God on our individual spiritual journeys

**An Analytical Approach to Spiritual Science** Chris Taylor, 2012-07-12

There are several different themes running through my book but the predominant ones are as follows One essential aspect is to assist the ordinary person in the street to find personal confirmation of the existence of the afterlife and so called paranormal phenomena and to highlight possible procedures and methodologies of thinking to achieve this This can enable any seeker of truth to obtain the appropriate evidence of spiritual science in their own personalized way suitable to their spiritual journey The other major and perhaps most important theme is to establish spirituality as a science with analytical laws which are provable and can be adapted to solve any range of societal problems This is of primary relevance not only for all political economic and social institutions to embark upon vitally needed social reforms but also to scientists who need to be convinced that there is one integral and holistic body of scientific truth and that what we term as spirituality is just one part of this The vital message is that any conceivable societal problem can be solved or improved by application of a combination of these spiritual laws
