The Measured Word:

The Measured Word Kurt Brown,2001 Though the interests of science and art frequently seem to inhabit opposite poles The Measured Word assembles a brilliant anthology of twelve essays that illumine the historic and newly emerging relationships between the poetic and scientific imaginations Assembling the writings of leading contemporary poets essayists and thinkers Kurt Brown highlights ways in which poets use scientific discoveries and mathematical ideas to their artistic advantage and offers insight on the recently apparent integration of technology and other discoveries into the postmodernist poetry Here are meditations on the similarities and differences between the poetic and scientific imagination on the poetic use of fractals on hypertext on the changing shape of poetry in the scientific age Commentary by Czech poet and immunologist Miroslav Holub Paul Lake Alison Hawthorne Deming Alice Fulton Forrest Gander and Stephanie Strickland among others presents a diverse selection of opinions These viewpoints are complemented by many careful innovative readings of individual poems informed by the sciences The writings in this collection not only celebrate the advent of a new age of discovery but also identify the need for a revision of the western thinking that separates the mind and the heart replacing division with the reciprocity of mutual communication
