Earth Stood Still [The Law of the Future and the Future of Law](#) Sam Muller, Stavros Zouridis, Morly Frishman, Laura Kistemaker, 2011-06-21 The Law of the Future and the Future of Law is a unique collection of think pieces in which a wide variety of experts share their thoughts on how they envision the future of law. By asking the question What do you see as the most significant challenges for the development of the law? What developments are we likely to see in the coming two to three decades? What do those developments mean for national legal systems as a whole? the Hague Institute for the Internationalisation of Law HiiL has canvassed the views of a large number of renowned experts in particular areas of law. This volume was prepared as part of the Law of the Future Joint Action Programme and as the basis of the Law of the Future Conference on 23 and 24 June 2011. The Law of the Future Joint Action Programme is based on the premise that prospective thinking about law is not only desirable but also required in order to ensure that law and legal systems do not become obsolete, ineffective or unjust. The aim is to set a world standard in thinking ahead to guide decision makers today. For more information visit www.lawofthefuture.org

The Rise and Fall of the Future Gordon Arnold, 2020-08-04 Mid 20th century America envisioned a wondrous future of comfort, convenience and technological advancement. Popular culture including World's Fairs, science fiction and advertising fed high hopes even when war and hardship threatened American ingenuity and consumer culture promised to deliver flying cars, undersea cities, household robots and space travel. By the 1960s political assassinations, the civil rights and women's movements, the Vietnam War and the generation gap eroded that optimism, refocusing attention on the issues of the present. The nation's utopian dream was brief but revealing. Based on a wide range of sources this book takes a fresh look at America's precipitous fall from futurism to disillusionment.
