The Higher Animals:

The Higher Animals H. E. F. Donohue, 1965 **Jakob von Uexküll and Philosophy** Francesca Michelini, Kristian Köchy, 2019-12-09 Dismissed by some as the last of the anti Darwinians his fame as a rigorous biologist even tainted by an alleged link to National Socialist ideology it is undeniable that Jakob von Uexküll 1864 1944 was eagerly read by many philosophers across the spectrum of philosophical schools from Scheler to Merleau Ponty and Deleuze and from Heidegger to Blumenberg and Agamben What has then allowed his name to survive the misery of history as well as the usually fatal gap between science and humanities This collection of essays attempts for the first time to do justice to Uexküll's theoretical impact on Western culture By highlighting his importance for philosophy the book aims to contribute to the general interpretation of the relationship between biology and philosophy in the last century and explore the often neglected connection between continental philosophy and the sciences of life Thanks to the exploration of Uexküll's conceptual legacy the origins of cybernetics the overcoming of metaphysical dualisms and a refined understanding of organisms appear variedly interconnected Uexküll's background and his relevance in current debates are thoroughly examined as to appeal to undergraduate and postgraduate students as well as postdoctoral researchers in fields such as history of the life sciences philosophy of biology critical animal studies philosophical anthropology biosemiotics and biopolitics LIFE ,1962-09-28 LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century It now lives on at LIFE.com the largest most amazing collection of professional photography on the internet Users can browse search and view photos of today's people and events They have free access to share print and post images for personal use **Program** Bryn Mawr College, 1890 **The Human Person** David Braine, 2019-07-09 A philosophical work that addresses the validity of the question What is it for the human being to be an animal and for this animal to be a spirit Braine argues that the perspectives of materialism and dualism are different casts of the same flawed mold and offers a holistic alternative Braine further argues that perception is inseparable from behavior and that the human propensity to produce language separates us from other animals Culminating in a discussion of the meaning of death this is rich and passionate philosophical argument for the human being as animal and soul The Westminster Review ,1882 Animal Physiology. New edition ... partly re-written William Benjamin CARPENTER, 1859 *The English Cyclopædia* ,1856 *German Philosophy in the Twentieth Century* Julian Young, 2020-10-25 The course of German philosophy in the twentieth century is one of the most exciting and controversial in the history of human thought In this outstanding and engaging introduction a companion volume to his *German Philosophy in the Twentieth Century* Weber to Heidegger Julian Young examines and assesses the way in which some of the major German thinkers of the period reacted often in starkly contrasting ways to the challenges posed by the nature of modernity the failure of liberalism and the concept of decline Divided into two parts exploring major intellectual figures of the left and right respectively Young introduces and assesses the thought of the following figures Georg Lukács the critique of capitalism
