Conference, 2001 This year's conference explores the ways in which dance forms circulate across communities regions and nations acquiring new meanings as they travel While the term globalization has gained currency in scholarly debates of recent years the dispersion of performance practices is hardly a new phenomenon Thus the conference includes both historical and contemporary analyses of dances migrations What happens when dances migrate It is common knowledge that founding figures in European and Euro American modern dance appropriated Asian movement vocabularies in their choreographies But scholars are only beginning to examine the ways in which Latin American African and Asian folkloric dance convention has been inflected by European concert dance training and stage practice as well as MTV choreographers By focusing on the circulation of movement styles pedagogies and performance conventions we hope to trouble some of the categorical distinctions which have tended to divide dance research between Western and non Western classical and folkloric and ritual social and theatrical genres Arguably the histories of many contemporary dance forms are more complex than such
