How did geophysics begin Who were the pioneers of this new science What instruments did they devise to measure the Earth related phenomena they were interested in This Memoir attempts to answer such questions in a well illustrated and largely non technical account The seventeenth century saw magnetism used as an aid to prospecting for iron ore in Sweden and Isaac Newton s derivation of the law of gravitational attraction A gradually increasing interest in physics of the Earth brought forth the new discipline of geophysics in the early nineteenth century and by the end of the following century airborne and satellite based investigations had become routine The Emergence of Geophysics explores this evolution in several parallel strands terrestrial magnetism and electricity gravity seismicity heat geodynamics and radioactivity broadly reflecting the timing of their introduction as tools aiding geophysical studies Biographical information is included for many of its practitioners and the book should be of interest to both geophysicists and to anyone interested in the history of Earth science **Precambrian Geology of Finland** Martti Lehtinen, Pekka A. Focusing on the Precambrian in the central part of the Fennoscandian Shield the book combines the results from modern geological and geophysical research into a detailed petrologic lithologic and structural synthesis and interpretation of the Archean and Proterozoic of Finland It will be of value to anyone interested in the evolution of the shield in particular and in Precambrian geology in general *The History of Geophysics in Finland.
