

# CLASSROOM DISCIPLINE

## DEFINITION

"[Classroom discipline refers to] the teacher's effort in preventing, redirecting, and reprimanding misbehavior by setting clear rules and expectations, monitoring, and adequately reacting to undesired behavior"

(Lettink, 2020)

## EXAMPLES

- **Clear Expectations:** Set clear rules and expectations from the start.
- **Consistent Consequences:** Apply consequences consistently for rule-breaking.
- **Positive Reinforcement:** Reward good behavior to encourage it.

## **Teacher's Guide to Successful Classroom Management and Differentiated Instruction** Billie F. Birnie, 2017-03-08 A

Teacher's Guide to Successful Classroom Management and Differentiated Instruction is a practical straightforward conversation with teachers about two key aspects of their work. The first section shows teachers how to create the learning environment they want, leading them step by step through the process that establishes a productive, trusting relationship between teacher and students. The second section describes differentiated instruction: what it is and how to do it where it fits into the teaching cycle and how it yields maximum gains for every student. Illustrating concepts with examples from both elementary and secondary classrooms, the guide also offers strategies, checklists, and activities to help teachers improve their practice.

Eric Rice, James H. Hughes, 1982 **Training Behaviour Therapists (Psychology Revivals)** Derek Milne, 2015-03-27 Originally published in 1986, one of the major developments in behavioural psychotherapy and mental health in the previous decade had been the growing involvement of non-psychologists in behaviour therapy. This was a result of the fact that there were too few psychologists to cope with problem behaviour and that other professionals or carers began to appreciate more clearly their potential as agents of behaviour change. Foremost among these mediators of therapy were parents, nurses, particularly psychiatric nurses, and teachers, especially remedial teachers. Their involvement had greatly increased the efficiency of behaviour therapy at the time and opened up a new era in applied psychology. It also entailed the development of new training formats, evaluation procedures and implementation strategies. The main aim of this book was to provide a summary of the research relevant to these issues and to offer practical guidelines to those who were interested in training or being trained as behaviour therapists. For this reason there are chapters by researchers who have been involved in training parents, nurses and teachers. These chapters provide a detailed account of training in a form that was rarely available in published

form at the time and even today should be of great assistance to readers
