Divekar, 2012-12-06 Circuit simulation is widely used for the design of circuits both discrete and integrated Device modeling is an important aspect of circuit simulation since it is the link between the physical device and the simulated device Currently available circuit simulation programs provide a variety of built in models Many circuit designers use these built in models whereas some incorporate new models in the circuit simulation programs Understanding device modeling with particular emphasis on circuit simulation will be helpful in utilizing the built in models more efficiently as well as in implementing new models SPICE is used as a vehicle since it is the most widely used circuit simulation program However some issues are addressed which are not directly applicable to SPICE but are applicable to circuit simulation in
