SEPP is intended for use by college or university juniors, seniors or graduate students who are enrolled in a general one-semester course or two-semester sequence of courses in software engineering and who are majoring in computer science, applied computer science, computer information systems, business information systems, information technology or any other area in which software development is the focus. It is assumed that these students have taken at least two computer programming courses as well as any additional computing courses required in the first two years of their major. SEPP may also be appropriate for use in an introductory survey course in a full-fledged software engineering curriculum. In such a course, the instructor can choose the topics to be covered as well as the depth in which those topics are treated in an effort to provide freshmen or sophomore software engineering students with a preview of the concepts they will encounter later in their curriculum.

**SWEBOK CONTENT**

SEPP covers or touches on most of the topics listed in the Software Engineering Body of Knowledge (SWEBOK) Guide V3. This guide contains a comprehensive description of the knowledge required of a professional software engineer after four years of experience and is viewed by the IEEE as the authoritative source of software engineering knowledge. In addition, the Guide was used to inform the contents of the Computer Science Curricula 2013 Curriculum Guidelines for Undergraduate Degree Programs in Computer Science and the Software Engineering 2013 Curriculum Guidelines for Undergraduate Degree Programs in Software Engineering, both of which were developed by a joint
