The symposium like previous ones in the series brought together researchers, developers and users of complex human machine systems. Discussions covered manufacturing, process control, aircraft and air traffic control, and administrative processes, with an emphasis on how to design such systems and integrate both developers and users into the design process. The main issues addressed therefore were the joint engineering of production processes, information technology and work organisation, and the possibility that this may lead to the redefinition of human operators in process automation **Reverse Acronyms, Initialisms, & Abbreviations Dictionary** ,2007 Software Technology Conference ,1992 Proceedings, IEEE Control Systems Society ...
