

The Spider and the Fly (1829)

"Will you walk into my parlour?" said the Spider to the Fly,
"Tis the prettiest little parlour that ever you did spy;
The way into my parlour is up a winding stair,
And I have many curious things to shew when you are there."
"Oh no, no," said the little Fly, "to ask me is in vain,
For who goes up your winding stair can ne'er come down again."

"I'm sure you must be weary, dear, with soaring up so high;
Will you rest upon my little bed?" said the Spider to the Fly.
"There are pretty curtains drawn around; the sheets are fine and thin,
And if you like to rest awhile, I'll snugly tuck you in!"
"Oh no, no," said the little Fly, "for I've often heard it said,
They never, never wake again, who sleep upon your bed!"

Said the cunning Spider to the Fly, "Dear friend what can I do,
To prove the warm affection I've always felt for you?
I have within my pantry, good store of all that's nice;
I'm sure you're very welcome—will you please to take a slice?"
"Oh no, no," said the little Fly, "kind sir, that cannot be,
I've heard what's in your pantry, and I do not wish to see!"

"Sweet creature!" said the Spider, "you're witty and you're wise,
How handsome are your gauzy wings, how brilliant are your eyes!
I've a little looking-glass upon my parlour shelf,
If you'll step in one moment, dear, you shall behold yourself."
"I thank you, gentle sir," she said, "for what you're pleased to say,
And bidding you good morning now, I'll call another day."

The Spider turned him round about, and went into his den,
For well he knew the silly Fly would soon come back again:
So he wove a subtle web, in a little corner sly,
And set his table ready, to dine upon the Fly.
Then he came out to his door again, and merrily did sing,
"Come hither, hither, pretty Fly, with the pearl and silver wing;
Your robes are green and purple—there's a crest upon your head;
Your eyes are like the diamond bright, but mine are dull as lead!"

Miles Raina Mooncrest, AI, 2025-02-27 Spiders Fly Miles unveils the fascinating world of spider ballooning where spiders use self made silk parachutes to travel vast distances. This aerial dispersal is a sophisticated adaptation allowing spiders to colonize new habitats and maintain genetic diversity. Uncover how these creatures often en masse embark on journeys previously unimagined, showcasing a unique blend of spider behavior, silk parachutes and atmospheric conditions. Early naturalists observed this phenomenon but recent advancements in technology now allow for deeper investigation into spider migration and its ecological adaptation. The book explores the biophysics of spider silk, the ecological role of ballooning in spider dispersal and the evolutionary pressures that shaped this behavior. Spiders Fly Miles examines lift, drag, weather patterns and the colonization of islands. Discover how spider ecology and distribution patterns are influenced globally by these tiny travelers. High altitude experiments provide unique datasets combined with wind and atmospheric data, offering a comprehensive view into this complex interplay between spider ballooning and the environment. The book begins with an introduction to spiders and their ecological roles, followed by an examination of silk production. It then delves into the physical aspects of ballooning, the ecological consequences and the evolutionary origins. Concluding with the broader implications of spider ballooning, this book connects to atmospheric science, evolutionary biology and ecology, enriching our understanding of this incredible phenomenon.
