H. Bransden, Charles Jean Joachain, **Rare Earth and Transition Metal Doping of Semiconductor Materials** Volkmar Dierolf, Ian Ferguson, John M Zavada, 2016-01-23 Rare Earth and Transition Metal Doping of Semiconductor Material explores traditional semiconductor devices that are based on control of the electron's electric charge This book looks at the semiconductor materials used for spintronics applications in particular focusing on wide band gap semiconductors doped with transition metals and rare earths These materials are of particular commercial interest because their spin can be controlled at room temperature a clear opposition to the most previous research on Gallium Arsenide which allowed for control of spins at supercold temperatures Part One of the book explains the theory of magnetism in semiconductors while Part Two covers the growth of semiconductors for spintronics Finally Part Three looks at the characterization and properties of semiconductors for spintronics with Part Four exploring the devices and the future direction of spintronics Examines materials which are of commercial interest for producing smaller faster and more power efficient computers and other devices Analyzes the theory behind magnetism in semiconductors and the growth of semiconductors for spintronics Details the properties of semiconductors for spintronics *Handbook of Nanoscience, Engineering, and Technology* William A. Goddard III, Donald Brenner, Sergey Edward Lyshevski, Gerald J Iafrate, 2002-10-29 Nanotechnology science and engineering spearhead the 21st century revolution that is leading to fundamental breakthroughs in the way materials devices and systems are understood designed made and used With contributions from a host of world class experts and pioneers in the field this handbook sets forth the fundamentals of nanoelectromechanical systems NEMS studies their fabrication and explores some of their most promising applications It provides comprehensive information and references for nanoscale structures devices and systems molecular technology and nanoelectromechanical theory and promises to become a standard reference for the field **Introduction to Magnetic Random-Access Memory** Bernard Dieny, Ronald B.
