## **Structural Prevention Of Ethnic Violence:**

**Structural Prevention of Ethnic Violence** C. Scherrer, 2002-07-09 Today ethnic violence accounts for the majority of the world's conflicts. The question is how ethnic difference is to be recognized. The task is to prevent destructive forms of interaction between states and peoples. Autonomy arrangements have since the 1920s helped to resolve ethno-national conflicts in Europe. Measures include cultural independence and political representation. Outside Europe, the demand for self-governance led to a deepening of the classic form of minority protection. Federalization, decentralization, and territorial self-governance are proven means of averting conflict. Conflict prevention means a turning away from the cultural monopolism of nation-states.

**Structural Prevention of Ethnic Violence** Christian P. Scherrer, 1999 **Conflict Prevention and Peace-building in Southeast Asia**, 2003 **Encyclopedia of Violence, Peace, & Conflict** Lester R. Kurtz, 2008 The 2nd edition of *Encyclopedia of Violence, Peace, and Conflict* provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life. Building on the highly regarded 1st edition (1999) and publishing at a time of seemingly inexorably increasing conflict and violent behaviour, the world over, the *Encyclopedia* is an essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change. Covering topics as diverse as Arms Control, Peace Movements, Child Abuse, Folklore, Terrorism, and Political Assassinations, the *Encyclopedia* comprehensively addresses an extensive information area in 225 multi-disciplinary, cross-referenced and authoritatively authored articles.

*Conflict Prevention and Peace-building in Africa* Ulf Engel, 2001 **Using Force to Prevent Ethnic Violence** David Carment, Frank P. Harvey, 2001 More than ever before, ethnic struggle finds expression in the growing incidence and scale of displaced persons and refugee flows, as well as in exacerbated levels of ethnic minority abuse and involuntary assimilation. Demographic and political sources of instability in multi-ethnic societies assure the continuing significance of ethnic strife and the potential for intrastate ethnic violence far into the next millennium. While not all disagreements between ethnic groups can be expected to escalate into violence, more than a few have produced intractable and destructive conflicts, and one or more of these conflicts could ultimately reach levels that overwhelm international resources and capabilities. Carment and Harvey examine how regional and international security organizations can prevent destructive ethnic conflict and manage cases in which violence already is at hand. First, they develop a conceptual framework for advancing basic research on the prevention and management of intrastate ethnic violence. They evaluate theoretical knowledge about the nature of ethnic conflict using case material and quantitative assessments, and they apply these assumptions against recent instances of conflict management through an in-depth study of NATO's involvement in Kosovo and Bosnia. This book serves as an important research tool for students, scholars, and policy makers involved with ethnic conflict and international relations.

**The Structural Prevention of Mass Atrocities** Stephen McLoughlin,2014-07-17 This book offers a different approach to the structural prevention of mass atrocities It investigates the conditions that enable vulnerable countries to prevent the perpetration of such violence Structural prevention is commonly framed as the identifying and ameliorating of the root causes of violent conflict a process which typically involves international actors determining what these root causes are and what the best courses of action are to deal with them This overlooks why mass atrocities do not occur in countries that contain the presence of root causes In fact very little research has been conducted on what the causes of peace and stability are particularly in relatively countries located in regions marred by civil war and mass atrocities To better understand how such vulnerable countries prevent the commission of mass atrocities this book proposes an analytical framework which enables not only an understanding of risk which arises from the presence of root causes but also of the factors that build resilience in countries and consequently mitigate and manage such risk Using this framework three countries Botswana Zambia and Tanzania are analysed to account for their long term stability despite their location in neighbourhoods characterised by decades of civil war ethnic repression and mass atrocities This work is a significant contribution to the field of genocide studies and crimes against humanity and will be of interest to students and scholars alike **Genocide and Crisis in Central Africa** Christian P.
