The Martial Metropolis Us Cities In War And Peace:

The Martial Metropolis Roger W. Lotchin, 1984 Covers the period between the end of World War I and the escalation of the Vietnam conflict during which both US cities and the US military came of age. The cities chosen have had longstanding and broad partnerships with the military. Each city is either broadly representative or typical of some part of the partnership and provides coverage for different services kinds of cities and geographic locations

Los Angeles Roger Keil, 1998-12-30

This book combines a historical narrative of urbanisation in Los Angeles with an examination of its changing social geography. It provides a solid base from which to understand and explore the city further and a defined emphasis on recent developments. It focuses on the role of local actors in the globalisation of Los Angeles and traces the ways in which local

states boosters labour unions social movements neighbourhood and community organisations and other agents participate in negotiated world city formation

Arsenal of World War II Paul A. C. Koistinen, 2004 Prolific munitions production keyed

America's triumph in World War II but so did the complex economic controls needed to sustain that production. Artillery tanks planes ships trucks and weaponry of every kind were constantly demanded by the military and readily supplied by American business. While that relationship was remarkably successful in helping the US win the war it also raised troubling issues about wartime economies that have never been fully resolved. Paul Koistinen's fourth installment of a monumental five volume series on the political economy of American warfare focuses on the mobilization of national resources for a truly

global war. Koistinen comprehensively analyzes all relevant aspects of the World War II economy from 1940 through 1945 describing the nation's struggle to establish effective control over industrial supply and military demand and revealing the growing partnership between the corporate community and the armed services. Koistinen traces the evolution of federal

agencies mobilizing for war including the National Defense Advisory Commission the Office of Production Management and the Supply Priorities and Allocation Board and then focuses on the work of the War Production Board from 1942-1945. As the

war progressed the WPB and related agencies oversaw the military's supply and procurement systems. Stabilized the economy while financing the war closely monitored labor relations and controlled the shipping and rationing of fuel and food.

In chronicling American mobilization Koistinen reveals how representatives of industry and the armed services expanded upon their growing prewar ties to shape policies for harnessing the economy and how federal agencies were subsequently

riven with dissension as New Deal reformers and anti-New Deal corporate elements battled for control over mobilization itself. As the armed services emerged as the principal customers of a command economy the military-industrial nexus

consolidated its power and ultimately succeeded in bending the reformers to its will. The product of exhaustive archival research *Arsenal of World War II* shows that mobilization meant more than simply harnessing the economy for war it also

involved struggles for power and position among a great many interest groups and ideologies Nearly two decades in the making it provides an ambitious and enormously insightful overview of the emergence of the military industrial economy one that still resonates today as America continues to wage wars around the globe

Model for National Health Care Rickey Lynn Hendricks,1993 By 1990 the Kaiser Permanente health care plan with over 6 5 million members was the largest health maintenance organization HMO in the United States Rickey Hendricks tells the story of the phenomenal growth of this plan and of its effect on health care The Kaiser Permanente plan was to serve as a model for others due to its large scale and its combination of prepayment group practice complete facilities and preventive medicine Hendricks begins by profiling the founder of Kaiser Permanente Henry J Kaiser an industrial giant Kaiser was the contractor in the 1930s for the Hoover and Grand Coulee dams The workers Kaiser employed to build these dams were eager for health care and Kaiser knowing he had to honor workmen s compensation and health and safety laws prepared to provide it Kaiser wanted to care for the working class while operating within the free enterprise system He thought such a plan should offend neither the Left nor the Right But it did offend the latter Solo practitioners affiliated with the American Medical Association felt threatened and ostracized doctors in the group plan Some of the more conservative doctors charged that there was a communist influence in the plan Kaiser exacerbated the situation by attempting an anticommunist purge himself This merely alienated the plan s physicians Hendricks details how the plan was reorganized and decentralized in the 1950s following conflicts between the plan s physicians and Kaiser The physicians asserted their collective authority and created their own culture within the corporate power structure Kaiser Permanente revolutionized national health care by offering a preventive participatory model Hendricks shows how Kaiser Permanente remains a major force in health care today because it transcends both the paternalism of individual doctor patient relationships and the dependency of welfare capitalism

Essays on Sunbelt Cities and Recent Urban America Raymond A. Mohl,1990 For centuries scholars have scrutinized the cities of the Old World poking into ruins and libraries for unwritten and written clues to origins and demise The American cities that have played major roles in the history of the United States have also had their share of study But only recently have historians applied systematic analysis to what is now called the Sunbelt where half the nation's ten largest cities are located cities that have grown astronomically since World War II This volume brings together the important findings of leading urban historians Addressing a variety of topics such as the reasons behind the Sunbelt's boom their essays place the sunbelt phenomenon within the larger context of urban development nationwide Kenneth T Jackson begins the introduction by pointing out the problem of defining the Sunbelt and the reasons for urban growth in the sunbelt areas during the post World War II era Essays by Robert Fisher Roger W Lotchin and Robert B Fairbanks focus on specific cities and leadership issues on the attitudes that shaped Houston on the military's role in the urban development of San Diego and on the politics of governing Dallas from 1930 to 1960 An essay by Carl Abbott looks at the distinctive physical characteristics of cities in the Southwest Raymond A Mohl's essay on the transformation of urban America since 1945 and Zane L Miller's essay on Walter Prescott Webb and cultural regionalism provide broader contexts in which to view and understand urban sunbelt development The essays of this volume reflect the individual authors different methodologies and approaches Taken together they highlight the belief that national development and twentieth century urban trends were as important in shaping sunbelt cities as was the regional culture
