*The Measure of Poe* Louis Broussard, 1969      Handbook of Concentrator Photovoltaic Technology Carlos Algora, Ignacio Rey-Stolle, 2016-03-31 Concentrator Photovoltaics CPV is one of the most promising technologies to produce solar electricity at competitive prices High performing CPV systems with efficiencies well over 30% and multi megawatt CPV plants are now a reality As a result of these achievements the global CPV market is expected to grow dramatically over the next few years reaching cumulative installed capacity of 12.5 GW by 2020 In this context both new and consolidated players are moving fast to gain a strategic advantage in this emerging market Written with clear brief and self contained technical explanations Handbook of Concentrator Photovoltaic Technology provides a complete overview of CPV covering the fundamentals of solar radiation solar cells concentrator optics modules and trackers all aspects of characterization and reliability case studies based on the description of actual systems and plants in the field environmental impact market potential and cost analysis CPV technology is at a key point of expansion This timely handbook aims to provide a comprehensive assessment of all CPV scientific technological and engineering background with a view to equipping engineers and industry professionals with all of the vital information they need to help them sustain the impetus of this encouraging technology Key features Uniquely combines an explanation of the fundamentals of CPV systems and components with an overview of the market place and their real life applications Each chapter is written by well known industry specialists with extensive expertise in each particular field of CPV technology Reviews the basic concepts of multi junction solar cells and new concepts for CPV cells highlighting the key differences between them Demonstrates the state of the art of several CPV centres and companies Facilitates future cost calculation models for CPV Features extensive case studies in each chapter including coverage of CPV modules and systems

**Building Evaluation** Wolfgang F.E. Preiser, 2013-12-14 This book is about building evaluation in the broadest sense and it transcends the meaning and conventional boundaries of the evolving field of post occupancy evaluation by focusing on evaluation throughout the building delivery process This process is seen not just as being linear with a product in mind i.e. the completed and occupied building but rather it is seen as a cyclic evolution which has as its goal the continuous improvement of the quality of buildings This goal can only be accomplished if evaluation occurs throughout the building delivery process and if 1 the evaluation that does occur is systematic and rigorous 2 the data that is obtained can be fed into data bases and clearinghouses for use in future generations of buildings and 3 there is continuity in information flow The idea for this book originated with a symposium that was part of a conference held at the Technical University in Delft Netherlands in July of 1988 i.e. IAPS 10 the tenth biannual conference of the International Association for the Study of People and their Physical Surroundings Authors presented papers based on their book chapters and discussions ensued about the expanded boundaries of the field about theoretical methodological and practical issues as well as applications in building evaluation Other relevant topics were identified and several additional authors were invited to participate in order to round
