**Dependence** Stefan Hedlund, 2005-01-23 Russia's transition to a market economy has been tortuous to say the least However this book argues that the arguments and counter arguments that pitch shock therapy against gradualism are wide of the mark and quite pointless Indeed the reasons for the warped outcomes can actually be traced back through the long sweep of Russian history Decisions made in the distant past can fully influence policy making in the present Hedlund's thesis can like this be seen as influenced by the path dependency theories of Paul David among others **Russian Politics and**

investigates the moral dimensions of petty capitalism in Russia Drawing on an ethnographic enquiry into the small scale family based private sector of the city of Smolensk it examines the values moral ideas and sentiments that are entangled in the everyday workings of small businesses The book situates the realm of values within the broader dynamics of Russia's political economy and the global circuits of capital The moral frameworks of entrepreneurs incorporate conflicting values such that moralities associated with the Soviet order are intertwined with market orientations and neoliberal ideologies

**Canadian Slavonic Papers**, 2002 **Comparative Economics in a Transforming World Economy, third edition** J. Barkley Rosser, Jr., Marina V. Rosser, 2018-01-26 An approach to comparative economic systems that avoids simple dichotomies to examine a wide variety of institutional and systemic arrangements with updated country case studies Comparative economics with its traditional dichotomies of socialism versus capitalism private versus state and planning versus market is changing This innovative textbook offers a new approach to understanding different economic systems that reflects both recent transformations in the world economy and recent changes in the field This new edition examines a wide variety of institutional and systemic arrangements many of which reflect deep roots in countries cultures and histories The

book has been updated and revised throughout with new material in both the historical overview and the country case studies. It offers a broad survey of economic systems then looks separately at market capitalism, Marxism and socialism and new traditional economies with an emphasis on the role of religions. Islam in particular in economic systems. It presents case studies of advanced capitalist nations including the United States, Japan, Sweden and Germany, alternative paths in the transition from socialist to market economies taken by such countries as Russia, the former Soviet republics, Poland, China and the two Koreas and developing countries including India, Iran, South Africa, Mexico and Brazil. The new chapters on Brazil and South Africa complete the book's coverage of all five BRICS nations; the chapter on South Africa extends the book's comparative treatment to another continent. The chapter on Brazil with its account of the role of the Amazon rain forest as a great carbon sink expands the coverage of global environmental and sustainability issues. Each chapter ends with discussion questions.
