**Early Health Problems of the U.S. Nuclear Weapons Industry and Their Implications for Today** United States. Congress. Senate. Committee on Governmental Affairs,1989    **The Treaty Prohibiting Nuclear Weapons** Jonathan L. Black-Branch,2021-05-20 An examination of the Treaty on the Prohibition of Nuclear Weapons within the contemporary nuclear non proliferation and disarmament security architecture    **In Touch with Industry** ,1998    **Monthly Catalog of United States Government Publications** ,1995    **The Nuclear Weapons Industry** Kenneth A. Bertsch,Linda S. Shaw,1984    **Monthly Catalogue, United States Public Documents** ,1991    **Nuclear Proliferation, the Military-Industrial Complex, and the Arms Race** Kaitlyn Duling,2017-07-15 The Cold War introduced new military arsenals weapons of mass destruction The United States and the Soviet Union invested billions of dollars into the development of sophisticated and destructive weapons Creating a dangerous military arsenal became another objective After the Soviet Union detonated its first atomic bomb the United States tested the first hydrogen bomb This book examines how nuclear proliferation and the arms race influenced the trajectory of the Cold War    **The Plutonium Business and the Spread of the Bomb** Walter C. Patterson,1984    **Nuclear Weapons Proliferation in the Next Decade** Peter Lavoy,2007 This special issue examines the factors that are likely to shape nuclear weapons proliferation over the next decade    **Bernard Brodie and the Foundations of American Nuclear Strategy** Barry Howard Steiner,1991 Steiner analyzes how and why Brodie's understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie's work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

**Nuclear Weapons Databook: U.S. nuclear forces and capabilities** Thomas B. Cochran,1984    **American Airpower Strategy in Korea, 1950-1953** Conrad C. Crane,2000 The Korean War was the first armed engagement for the newly formed U.S. Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the

Yalu that existed at the end of the war. The book considers not only the actual air effort in Korea but also its ramifications. The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam. As America observes the fiftieth anniversary of its initial engagement in Korea, Crane's book is an important reminder of the lessons learned there. And as airpower continues to be a cornerstone of American defense, this examination of its uses in Korea provides new insights about the air force's capabilities and limitations.

**The Cold War Comes to Main Street** Lisle A. Rose, 1999. In 1950 Main Street American was abruptly traumatized. The sudden prospect of thermonuclear war with the Soviet Union, Senator McCarthy's vicious anticommunist crusade and the beginning of the Korean War all combined to dampen the public mood. The Cold War invaded every home. Rose maintains that 1950 was a pivotal year for the nation. He argues that the convergence of Korea, McCarthy and the bomb wounded the nation in ways from which we've never fully recovered. Brimming with originality, this book makes readers look at the Cold War from a dozen different angles.

**Frontiers Past and Future** Carl Abbott, 2006

Abbott offers a fruitful new way to read science fiction one that also greatly enriches our understanding of western history and its impact on our collective imagination. Detailing the overlap of science fiction and western fiction especially relating to their mutual interest in and concerns about frontier expansionism, he reveals an unsuspected common ground that informs the writings of both camps. Reviewing the work of many Hugo and Nebula Award winners as well as drawing upon popular film and television series like the Buck Rogers serials, Abbott's study journeys across the far reaches of science fiction's universe.

Total Cold War Kenneth Alan Osgood, 2006

Osgood focuses on major campaigns such as Atoms for Peace, People to People and cultural exchange programs. Drawing on recently declassified documents that record U.S. psychological operations in some three dozen countries, he tells how U.S. propaganda agencies presented everyday life in America to the world. Its citizens living full happy lives in a classless society where economic bounty was shared by all. Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion. He also reexamines the early years of the space race focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik.
