The Nuremberg Mind:

The Nuremberg Mind Florence R. Miale, Michael Selzer, 1975 The Nuremberg Mind Florence R. Miale, 1977 The Nuremberg Mind, 1975 The Nuremberg Mind Florence R. Miale, Michael Selzer, 1977 *The Pursuit of the Nazi Mind* Daniel Pick, 2014-05 The remarkable story of how the Allies used psychoanalysis to delve into the motivations of the Nazi leadership and to explore the mass psychology of fascism Of Mind and Murder George R. Mastroianni, 2018-09-07 Of Mind and Murder traces the history of psychological attempts to understand the Holocaust and critically assesses the existing literature As the dominance of the situationist interpretation of the psychology of the Holocaust popularized by Milgram wanes Of Mind and Murder suggests some possible paths forward to a new psychology of the Holocaust The Quest for the Nazi Personality Eric A. Zillmer, Molly Harrower, Barry A. Ritzler, Robert P. Archer, 2013-10-31 Half a century after the collapse of the Nazi regime and the Third Reich scholars from a range of fields continue to examine the causes of Nazi Germany An increasing number of young Americans are attempting to understand the circumstances that led to the rise of the Nazi party and the subsequent Holocaust as well as the implication such events may have for today as the world faces a resurgence of neo Nazism ethnic warfare and genocide In the months following World War II extensive psychiatric and psychological testing was performed on over 200 Nazis in an effort to understand the key personalities of the Third Reich and of those individuals who just followed orders In addressing these issues the current volume examines the strange history of over 200 Rorschach Inkblot protocols that were administered to Nazi war criminals and answers such questions as Why the long delay in publishing protocols What caused such jealousies among the principals How should the protocols be interpreted Were the Nazis monsters or ordinary human beings This text delivers a definitive and comprehensive study of the psychological functioning of Nazi war criminals both the elite and the rank and file In order to apply a fresh perspective to understanding the causes that created such antisocial behavior these analyses lead to a discussion within the context of previous work done in social and clinical psychology Subjects discussed include the authoritarian personality altruism obedience to authority diffusion of responsibility and moral indifference The implications for current political events are also examined as Neo Nazism anti-Semitism and ethnic hate are once again on the rise While the book does contain some technical material relating to the psychological interpretations it is intended to be a scholarly presentation written in a narrative style No prior knowledge of psychological testing is necessary but it should be of great benefit for those interested in the Rorschach Inkblot test or with a special interest in psychological testing personality assessment and the history of psychology It is also intended for readers with a broad interest in Nazi Germany Database of Dreams Rebecca Maura Lemov, 2015-01-01 Just a few years before the dawn of the digital age Harvard psychologist Bert Kaplan set out to build the largest database of sociological information ever assembled It was the mid 1950s and social scientists were entranced by the human insights promised by Rorschach tests and other innovative scientific protocols Kaplan along with anthropologist A I

Hallowell and a team of researchers sought out a varied range of non European subjects among remote and largely non literate peoples around the globe Recording their dreams stories and innermost thoughts in a vast database Kaplan envisioned future researchers accessing the data through the cutting edge Readex machine Almost immediately however technological developments and the obsolescence of the theoretical framework rendered the project irrelevant and eventually it was forgotten In a scrupulously researched and captivating new book Rebecca Lemov recounts the story of Kaplan s quest and brings to light an informative and disturbing chapter in the prehistory of Big Data Dust jacket **The Rape of the Mind** Joost Abraham Maurits Meerloo,1956 Since 1933 when a completely drugged and trial conditioned human wreck confessed to having started the Reichstag fire in Berlin Dr Joost A M Meerloo has studied the methods by which systematic mental pressure brings people to abject submission and by which totalitarians imprint their subjective truth on their victims minds Dr Meerloo spent the first two and one half years of WWII under the pressure of Nazi occupied Holland witnessing at first hand the Nazi methods of mental torture on more than one occasion Then after personal experiences with enforced interrogation he escaped from a Nazi prison and certain death to England where he was able as Chief of the Psychological Department of the Netherlands Forces to observe and study coercive methods officially After the war he came to the United States As more and more cases of thought control brainwashing and mental coercion were disclosed Cardinal Mindszenty Colonel Schwable Robert Vogeler and others his interest grew It was Dr Meerloo who coined the word menticide the killing of the spirit for this peculiar crime It is Dr Meerloo s position that through pressure on the weak points in men s makeup totalitarian methods can turn anyone into a traitor And in The Rape of the Mind he goes far beyond the direct military implications of mental torture to describing how our own culture unobtrusively shows symptoms of pressurizing people s minds He presents a systematic analysis of the methods of brainwashing and mental torture and coercion and shows how totalitarian strategy with its use of mass psychology leads to systematized rape of the mind He describes the new age of cold war with its mental terror verbocracy and semantic fog the use of fear as a tool of mass submission and the problem of treason and loyalty so loaded with dangerous confusion The Rape of the Mind is written for the interested layman not only for experts and scientists Perpetration-Induced Traumatic Stress Rachel MacNair,2005 This volume introduces the concept of Perpetration Induced Traumatic Stress PITS a form of PTSD symptoms caused by being an active participant in causing trauma The Journal of Mental Science ,1904 Vol 77 includes Yearbook of the Association 1931 **My War Criminal** Jessica Stern,2020-01-28 An investigation into the nature of violence terror and trauma through conversations with a notorious war criminal by Jessica Stern one of the world s foremost experts on terrorism Between October 2014 and November 2016 global terrorism expert Jessica Stern held a series of conversations in a prison cell in The Hague with Radovan Karadzic a Bosnian Serb former politician who had been indicted for genocide and other war crimes during the Bosnian War and who became an inspiration for white nationalists Though Stern was used to

interviewing terrorists in the field in an effort to understand their hidden motives the conversations she had with Karadzic would profoundly alter her understanding of the mechanics of fear the motivations of violence and the psychology of those who perpetrate mass atrocities at a state level and who like the terrorists she had previously studied target noncombatants in violation of ethical norms and international law How do leaders persuade ordinary people to kill their neighbors What is the ecosystem that creates and nurtures genocidal leaders Could anything about their personal histories personalities or exposure to historical trauma shed light on the formation of a war criminal s identity in opposition to a targeted Other In My War Criminal Jessica Stern brings to bear her incisive analysis and her own deeply considered reactions to her interactions with Karadzic a brilliant and often shockingly charming psychiatrist and poet who spent twelve years in hiding disguising himself as an energy healer while also offering a deeply insightful and sometimes chilling account of the complex and even seductive powers of a magnetic leader and what can happen when you spend many many hours with that person

Hitler's

Mind Edleff H. Schwaab,1992-03-30 This book is the most up to date comprehensive analysis of Hitler written by a psychologist Going beyond the reliance on a Freudian interpretation of Hitler s personality Schwaab employs his knowledge of abnormal psychology to penetrate the paranoid world of Hitler and to demonstrate the depth of his mental disturbance The analysis is framed by a poignant personal reflection on Schwaab s experiences and those of his father who was first a follower of Hitler and later one of those who attempted to assassinate him growing up in Nazi Germany and an afterword in which the meaning of Nazism is placed in the context of contemporary developments in a reunited Germany
