The Assassinations Peter Dale Scott,Paul Hoch,Russell Stetler,1976    The Assassination of William McKinley Cary Federman,2017-12-06 This book is an examination of the assassination of President William McKinley by Leon Czolgosz an American born purported anarchist This work offers a new and different way to approach historical crime stories Rather than accepting the idea that Czolgosz was inherently dangerous because of his ethnic background or his obscure political statements Federman argues rather that political relations historical events and the developing discourses in the natural and social sciences toward normal and pathological behaviors structured the meaning of the assassination Federman proposes there are six ways to view an assassin each corresponding to a social science Consequently each chapter of this manuscript examines a social science and its relation to the assassination Overall there are three purposes to this work One is to

examine the rise of the social sciences at the time of the assassination The second is to explore the historical and political understanding of political violence and the third is to examine the meaning of legal responsibility
