

THE EASTERN HIGHLANDS

NOTES

The Eastern Highlands are a series of mountain ranges extending from the north to the south of the island. They are characterized by high peaks, deep valleys, and numerous lakes. The climate is generally cool and wet, with frequent rain and snow. The vegetation is mainly coniferous forest, with some deciduous trees in the lower valleys. The population is sparse, with most of the people living in the valleys and around the lakes.

ROAD TO LAKE

The road to Lake is a narrow, winding path that leads from the valley floor up to the lake. It is a difficult journey, especially in winter when the snow is deep and the ice is thick. The road is made of dirt and is often in poor condition. The lake is a beautiful sight, with its clear water reflecting the surrounding mountains. The water is cold, but it is a good place to go for a swim in the summer. The lake is surrounded by a dense forest of tall, thin trees. The forest is very quiet, and the only sound is the rustling of the leaves. The lake is a very special place, and it is worth the effort to get to it.
