**The History of an Islamic School of Law** Nurit Tsafrir, 2004 So closely is the early development of the Hanafi school interwoven with non legal spheres the political social and theological that its study is essential to a proper understanding of medieval Islamic history Tsafrir offers a thorough examination of the first century and a half of the school's existence the period during which it took shape A History of Islamic Law N. J. Coulson, 2011 The classic introduction to Islamic law tracing its development from its origins through the medieval period to its place in modern Islam *The Formation of the Sunni Schools of Law, 9th-10th Centuries C.E.* Christopher Melchert, 2024-01-08 The Sunni schools of law are named for jurists of the eighth and ninth centuries but they did not actually function so early The main division at that time was rather between adherents of the *ra'y* and *ad-h* schools No school had a regular means of forming students Relying mainly on biographical dictionaries this study traces the constitutive elements of the classical schools and finds that they first came together in the early tenth century particularly with the work of Ibn Surayj d 306 918 al Khall l d 311 923 and a series of *anaf* teachers ending with al Karkh d 340 952 Malikism prospered in the West for political reasons while the *hir* and *Jarir* schools faded out due to their refusal to adopt the common new teaching methods In this book the author fleshes out these historical developments in a manner that will be extremely useful to the field while at the same time developing some new and highly original perspectives The Islamic School of Law Peri J. Bearman, Rudolph Peters, Frank E. Vogel, 2005 These selected papers from the III International Conference on Islamic Legal Studies held in 2000 at Harvard Law School offer building blocks toward the entire edifice of understanding the complex development of the *madhhab* a development that even in the contemporary dissolution of *madhhab* lines and grouping continues to fascinate **Origin and Development of Islamic Law** Majid Khadduri, Herbert J. Liebesny, 2008 The American profession should welcome this exhaustive and authentic work edited by two scholars who are authorities on the law of Islam and also students of the law of the United States These editors have enlisted leading authorities on special subjects and have presented the whole in a manner that should appeal to American interest and understanding Dr Khadduri and Dr Liebesny are entitled to our thanks and to our congratulations It is to be hoped that Law in the Middle East will be widely read and pondered by the American legal profession and all who believe understanding begets good will *Islamic Law* Gavin N. Picken, 2011 Volume III focuses on the consolidation and consequent perceived stagnation of Islamic law in the medieval period alluded to in the traditional accounts of Islamic legal theory The final volume in the collection examines Islamic law in the modern period and the challenges of living in a modern technologically advanced world Supplemented with a full index Islamic Law includes a comprehensive introduction newly written by the editor which places the collected material in its historical and intellectual context It is certain to be valued as a vital research resource Publisher description Between God and the Sultan Knut S. Vikør, 2005 The contrast between religion and law has been continuous throughout Muslim history Islamic law has always existed in a tension between these

two forces God who gave the law and the state the sultan representing society and implementing the law This tension and dynamic have created a very particular history for the law in how it was formulated and by whom in its theoretical basis and its actual rules and in how it was practiced in historical reality from the time of its formation until today That is the main theme of this book Knut S Vikor introduces the development and practice of Islamic law to a wide readership students lawyers and the growing number of those interested in Islamic civilization He summarizes the main concepts of Islamic jurisprudence discusses debates concerning the historicity of Islamic sources of dogma and the dating of early Islamic law describes the classic practice of the law in the formulation and elaboration of legal rules and practice in the courts and sets out various substantive legal rules on such vital matters as the family and economic activity

**History of Islamic Law** Noel Coulson, 2019-06-01 The classic introduction to Islamic law tracing its development from its origins through the medieval period to its place in modern Islam *Denver journal of international law and policy*, 1999 *The Second Formation of Islamic Law* Guy Burak, 2015-01-12 The Second Formation of Islamic Law offers a new periodization of Islamic legal history in the eastern Islamic lands

**The Formation of Islamic Law** Wael B. Hallaq, 2016-12-05 The fourteen studies included in this volume have been chosen to serve several purposes simultaneously At a basic level they aim to provide a general if not wholly systematic coverage of the emergence and evolution of law during the first three and a half centuries of Islam On another level they reflect the different and at times widely divergent scholarly approaches to this subject matter These two levels combined will offer a useful account of the rise of Islamic law not only for students in this field but also for Islamicists who are not specialists in matters of law comparative legal historians and others At the same time however and as the Introduction to the work argues this collection of distinguished contributions illustrates both the achievements and the shortcomings of paradigmatic scholarship on the formative period of Islamic law

*Legal Traditions of the World* H. Patrick Glenn, 2000 Written in a clear and accessible style this prize winning work seeks to recast the discipline of comparative law and offers a major new means of conceptualizing law and legal relations across the world Instead of a narrow focus on national legal systems Glenn places national laws in the broader context of legal traditions He examines seven of the world's most important and complex legal traditions in detail chthonic or indigenous law talmudic law civil law islamic law common law hindulaw and Asian law Each tradition is examined in terms of its institutions and substantive law its foundational concepts and methods its attitude towards the concept of change and its teaching on relations with other traditions and peoples Mutual influences throughout history are noted and whilst the major and important differences are admitted the various traditions are nevertheless shown to be fundamentally commensurable *Legal Traditions of the World* concludes with a synthesis of the contribution of legal traditions to the understanding of tradition generally The normativity and multiplicity of the world's legal traditions are examined as is their ability as complex traditions to reconcile major differences of opinion or belief in a peaceable manner Complex traditions are ultimately shown to

represent multivalent forms of logic and can thus be regarded as the best means of facilitating sustainable human diversity in an increasingly interdependent world
