The History Of Gardens:

The History of Gardens Christopher Thacker, 1985-10-22 Christopher Thacker tells the history of gardens from their origins in the natural paradises of Greek myth to the present day Studying individual gardens or garden topics which are representative of an age or region he builds up a comprehensive survey of the gardens and garden theories of an era Google Books *A Cultural History of Gardens in the Renaissance* Elizabeth Hyde, Michael Leslie, John Dixon Hunt, 2013 *The History of Garden Design* Monique Mosser, Georges Teyssot, 1991-01-01 The book presents the latest most stimulating thought and research on the history of the garden from the fifteenth century to the present day in a series of essays which make up a mosaic picture of the garden in the Western world The humanist garden in Renaissance Italy the concepts of the Sublime and the Picturesque mazes grottoes and other curiosities city parks American land art and even Disneyland are amongst the topics treated Individual gardens are analysed as paradigms of their type the Hortus Palatinus in Heidelberg the Parc Monceau in Paris the Park Guell in Barcelona Stowe in England and many more Book Jacket **The Genius of Gardening** Christopher Thacker, 1994 *A Cultural History of Gardens in the Modern Age* John Dixon Hunt, 2015-05-01 Landscape architecture and garden making have witnessed huge changes during the twentieth century and the impact of these will continue to be discussed and interpreted in the twenty first New materials and responses to different social conditions along with new attitudes to how gardens are perceived and interpreted and above all the relationship of built work to the larger landscape of territory and society all have challenged long held practices of garden making even while those same traditions continue to be at the centre of both designers and users *An Economic History of the English Garden* Roderick Floud, 2019-11-07 Roderick Floud's ground breaking study of the history money places and personalities involved in British gardens over the past 350 years gives fascinating insight into why gardening is part of this country's soul Michael Heseltine Deputy Prime Minister 1996-1997 Thousands of books have been written about the history of British gardens but Roderick Floud one of Britain's most distinguished economic historians asks new and important questions how much did gardens cost to build and maintain and where did the money come from Superbly researched it is full of information which will surprise both economists and gardeners The book is fun as well as edifying Floud shows us gardens grand and humble and introduces us gardeners plantsmen and technologies in wonderful varieties Jane Humphries Centennial Professor London School of Economics At least since the seventeenth century most of the English population have been unable to stop making improving and dreaming of gardens Yet in all the thousands of books about them this is the first to address seriously the question of how much gardens and gardening have cost and to work out the place of gardens in the economic as well as the horticultural life of the nation It is a new kind of gardening history Beginning with the Restoration of Charles II in 1660 Roderick Floud describes the role of the monarchy and central and local government in creating gardens as well as that of the generally aristocratic or plutocratic builders of the great gardens of Stuart Georgian and Victorian England He considers

the designers of these gardens as both artists and businessmen often earning enormous sums by modern standards matched by the nurserymen and plant collectors who supplied their plants He uncovers the lives and rewards of working gardeners the domestic gardens that came with the growth of suburbs and the impact of gardening on technical developments from man made lakes to central heating AN ECONOMIC HISTORY OF THE ENGLISH GARDEN shows the extraordinary commitment of money as well as time that the English have made to gardens and gardening over three and a half centuries It reveals the connections of our gardens to the re establishment of the English monarchy the national debt transport during the Industrial Revolution the new industries of steam glass and iron and the built environment that is now all around us It is a fresh perspective on the history of England and will open the eyes of gardeners and garden visitors to an unexpected dimension of what they do

Perspectives on Garden Histories Michel Conan, 1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline
