**The Physics and Metaphysics of Transubstantiation** Mark P. Fusco, 2023-08-18 In this book Mark P. Fusco offers a historical philosophical and theological review and appraisal of current research into quantum post modern atheistic mathematical and philosophical theories that engage our interpretation of Hans Urs von Balthasar and Ferdinand Ulrich's accounts of Ur Kenosis. This cross disciplinary approach inspires a new speculative metaphysical theory based on the representation of being as a holo somatic ontology. Holocryptic metaphysics gives us a novel interpretation of transubstantiation as it is founded on the findings of quantum mechanical theory. The quantum object and black hole's properties present a new way to explain physical matter based on its holographic identity. This scientific theory for representing physical matter's identity is recognized for example in the symmetry existing between a subatomic particle and its orbital shell, a single particle's identity in relationship to its thermodynamic system, Hawking radiation and black hole entropy. Further the properties of quantum non locality and teleportation signpost a new way to understand the Eternal Logos relationship to Jesus Christ and the Eucharist.
