standardized experimental design The interpretation of the results by means of the appropriate statistical formulas should then become a purely routine operation The available literature is rather technical in character and several years experience with postgraduate students has shown that there is a real demand for a more elementary exposition of statistical technique This book is an attempt to meet this demand and is essentially the detailed analysis of data from a representative series of experiments typical of some of the commoner statistical problems encountered by the average research worker In certain examples the original data have been slightly simplified in order to make it easy to follow the successive stages in the arithmetical calculations It is hoped that these representative examples may serve as a practical guide to the research worker in the design and interpretation of his experiments     *Application of Statistical Methods to Agricultural Research*, Etc Harry Houser LOVE,1936     **Research Method and Procedure in Agricultural Economics** Social Science Research Council (U.S.),Social Science Research Council (U.S.).
