**The Rise, Decline, and Renewal of Silicon Valley's High Technology Industry** Dan M. Khanna,1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company

The High Technology of Silicon Valley Everett M. Rogers,1985

**Silicon Valley Fever** Everett M. Rogers,Judith K. Larsen,1984-04-19 Reviewing the development of California s Silicon Valley from the now legendary meeting of Hewlett and Packard to the development of the Stanford Research Park to the near overnight success of Apple Computers Intel etc the authors present a history of the development of the technology and the amazing individuals who created it as well as a sociological study of that technology in its local national and international contexts They conclude with a thought provoking assessment of the future of Silicon Valley the capability of the Japanese to overtake the Americans and the changes to be seen in an information society ISBN 0 465 07821 4 19 95

*Growth Policy in the Age of High Technology* Jurgen Schmandt,Robert Wilson,2018-03-29 Originally published in 1990 this book provides an authoritative and detailed account of the initiatives of US state governments with science and technology programs designed to foster economic growth Two key questions are posed Do state governments have policy instruments that are sufficiently powerful to affect thelevels and growth rates of their regional economies and Are national and global economic forces so powerful that they render state action ineffective Several subsidiary themes are discusses in this context namely the most commonly used policy instruments the impacts on federalism and on governance and how well the universities and other educational institutions serve the economic activities imposed on them

Information for Innovation Stuart Macdonald,1998-04-09 Information is not taken seriously Much is said about the information age the information economy the information society and particularly about information technology but little about information itself If these are important then so is information But information is not as other goods it has some peculiar characteristics It cannot be displayed for sale without giving it away in the process Sold it goes to the buyer but still

remains with the seller Buying entails expressing demand in ignorance for buyers who do not know just what it is that they do not know Such characteristics have long been recognised by economists but it is not generally economists who have most to say about the importance of information This privilege is exercised by senior managers who speak passionately about knowledge based learning organizations by politicians and public servants anxious to compensate with policy and programme for the information failure of organization and market and by specialists in telecommunications and information technology bent on adding value to what they treat as just a commodity All are particularly enthusiastic about the innovation which springs from information Information usually requires new information Finding acquiring and mixing this new information with that already in use presents problems not least because complex information transactions are required rather than simple information transfer Solutions can be devised but only by accommodating the characteristics of information This book contrasts the way innovation is normally regarded in a variety of areas from eighteenth century agriculture to high technology from technology transfer to industrial espionage from corporate strategy to patents and independent inventors with how it appears from what is termed an information perspective that is one that puts information first The results are intriguing suggesting that radically different approaches to innovation and organization should be considered

**Handbook of Research on Innovation and Clusters** Charlie Karlsson,2008 This volume is an important step in furthering the discussion about how cluster strategies work and the implications for theory and policy Jennifer Clark Review of Regional Studies The role of innovations and clusters has increasingly dominated local and regional development policies in recent decades This authoritative and accessible Handbook considers important aspects of high tech clusters analyses insightful cluster case studies and provides a number of recommendations for cluster policies The chapters in this Handbook are written by international experts in the field and present evidence of the scope effects and potential of clusters as concentrations of innovative activities The authors emphasize that cluster development is not the only option for local and regional development and argue that for cluster policies to be worthwhile supporting policies in fields such as education R D transportation and communication infrastructure must accompany most cluster policies Furthermore several contributions stress that clusters often develop along a life cycle that may end with decline and even the disappearance of clusters Consequently this Handbook provides the basis for improving both research on innovation and clusters and the formulation and implementation of cluster policies Furnishing the reader with rich comprehensive discussion of innovations and clusters this Handbook will be an essential source for researchers and academics in the field as well as policymakers planners and specialists development experts and agencies and consultants

Managing

Complexity in High Technology Organizations Mary Ann Young Von Glinow,Susan Albers Mohrman,1990 High technology which accounts for a rapidly growing section of the global workforce presents a different set of management problems than have usually been encountered by traditional industry In this book Von Glinow Mohrman and their expert contributors discuss the reasons for this difference and define new organizational forms for global high technology management

Propounding a revolutionary approach to high technology management issues they explore management teams high velocity environments and high technology marketing as well as human resource considerations including team interdependence compensation and culture clash

**Building High-Tech Clusters** Timothy Bresnahan,Alfonso Gambardella,2004-04-05

This book was first published in 2004 National economic growth is fueled by the development of high technology clusters such as Silicon Valley The contributors examine the founding of ten clusters that have been successful at an early stage of growth in information technology Their key finding is that the economics of starting a cluster is very different from the positive feedback loop that sustains an established cluster While nothing succeeds like success in an established cluster far more difficult risky and unlikely are the initial conditions that give rise to successful clusters The contributors find regularities in the start of the successful clusters studied including Silicon Valley around 1964 These cases contain old economy factors such as competencies firm building capabilities managerial skills and connection to markets more than the flamboyant new economy factors that have been highlighted in prevailing years

Strategic Management in High

Technology Firms Michael W. Lawless,Luis R. Gomez-Mejia,1990 **Place Matters** Peter Dreier,John H. Mollenkopf,Todd Swanstrom,2004 Analyzes the problematic trends facing America s cities and older suburbs and challenges us to put America

s urban crisis back on the national agenda
