The Urban Vernacular in Southeast Asia Nor Zalina

Harun, Shireen Jahn Kassim, 2025-05-16 This book constructs a number of discourses dialectics and analyses across the disciplines of urban form architecture and urban experience thus incorporating both conservation and design issues It bridges the gap between practice and theory by reconstructing the role of the village or vernacular in the discourses and trends of the twenty first century post Covid19 environment Bringing together for the first time the confluences of theory and practice in the urban vernacular and the urban village the contributors use vernacular concepts and settings as a common framework serving as cultural bridges connecting traditional forms ecologies and habitats to new global ideas industrial economies and access to developing urban sustainability design planning and services in Asia s rising megacities The book begins with concerns of urban layout and morphology aiming to establish discourse shared principles and terminology

around conventional ideas of the village or traditional settlements apparently organic and disordered nature It then moves into architectural dimensions capturing formal cases of how the vernacular or traditional indigenous local concepts have inspired new ideas in award winning architecture and hence the importance of re examining the vernacular in light of the ongoing need to produce a more sustainable and place conscious fit in modern architecture and urban planning The book will be of interest to researchers in the fields of architecture urban planning and design urban geography design studies landscape architecture history of architecture urbanism and Asian Studies in particular those concerning Southeast Asia

*Experiential Visualization in Architectural Design Media* Vincent B. Canizaro,2023-10-30 Experimental Visualization in Architectural Design Media How It Actually Works is a theoretical practical and interdisciplinary account of the tools used by architects and designers The book focuses on the how these tools influence their ability to envision and craft the future experiential reality of buildings and environments The book is structured around two parallel sets of questions The first concerns the effects of various media on the designer s understanding of their work in experiential terms The media considered include the process of design build standard media such as scale model building hand drawing drafting and extends into the now dominant digitally based design media of BIM digital modeling and emerging VR technologies such as Enscape The second line of questioning seeks patterns of use and other attributes designers deploy in practice to achieve an experiential and meaningful understanding of their work with and through each medium To answer these questions the author provides a detailed assessment of the pros and cons affordance and constraint of each form of mediation and a set of recommendations documenting how experienced designers enhance their visualization skills to support such experiential design This work is interwoven with interdisciplinary consideration of technology perception media studies history and bolstered by the direct experiences of design professionals This book will be of interest to researchers working in the field of architecture and design as well as practising architects designers and students who are seeking guidance on how to effectively design and consider the experience of their future built environments
