**The Colombian Economy and Its Regional Structural Challenges** Eduardo A. Haddad, Jaime Bonet, Geoffrey J. D. Hewings, 2023-05-30 This book examines regional structural challenges on Colombia's path to sustainable social cohesion and regionally inclusive growth. These challenges can be divided into three main groups: i) those that focus on competitiveness and the supply side; ii) those that arise from critical business cycle issues on the demand side; and iii) those concerning environmental sustainability, employment, and social inclusion. The contributions written by experts on Latin American economics and regional science apply quantitative simulations based on a unified general equilibrium framework and address a wide range of topics including Colombia's competitive integration in global markets, human capital profiles, regional economic disparities, and public and private mechanisms of interregional income transfer. The challenges entailed by such high-profile and long-term issues as productivity growth and climate change are also analyzed. In addition, the book positions Colombia's experiences in an international comparative context. It argues that many other Latin American countries face similar challenges and provide evidence to substantiate this claim. By doing so, it offers valuable policy lessons for Latin American countries with similar difficulties.

*Export Dynamics and Economic Growth in Latin America* Sheila Gutierrez de Pineres, Michael Ferrantino, 2018-02-05 This title was first published in 2000. This text aims to be essential reading for anyone who wishes to understand the microeconomic foundations behind the Latin American export boom, the ways in which government policies affecting exports may retard or promote economic growth, and the future prospects of the proposed Free Trade Association of the Americas. The authors conduct an econometric analysis which uses measures of export

diversification, structural change in exports, and exports similarity which provide a basis for region wide comparisons. The cases of Chile, Colombia, Mexico, and Venezuela are analyzed in particular detail. Cross country analysis focuses on the potential role of export diversification in promoting economic growth in the context of other important determinants of growth.

*Sustainable Development in Mineral Economies* Richard M. Auty, Raymond F. Mikesell, 1998 The mineral economies comprise approximately one fifth of developing countries. They face special problems in achieving sustainable development and have as a group been less successful than resource deficient neighbours. This book examines the apparent paradox detailing the current problems facing the mineral economies and the future policies necessary to overcome these problems. Nine countries are studied: Botswana, Chile, Colombia, Indonesia, Jamaica, Namibia, Papua New Guinea, Peru, and Trinidad and Tobago. The authors argue that the key factor is not the sustainability of the mineral production that initially generates growth but the maintenance of the economic and social conditions for sustaining that growth. They draw upon

recent progress in environmental and natural resource accounting to show how this can be achieved and also assess the socio political factors that often constrain sustainable development *The Politics of Economic Reform in Colombia* Carlos Edward Juárez,1997

**Manufacturing for Export in the Developing World** Gerry Helleiner,1995-09-07 In recent years much has been made of the success of developing countries particularly in East Asia which have achieved economic growth by manufacturing goods which are then exported to developed economies Case studies of five countries uncover serious potential difficulties in maintaining the pace of manufacturing for export in the developing
