Regis O'Connor, 1984 **Exploring Communication Skills among Postgraduate Students in Diverse Academic Landscapes: A Comprehensive Study** KHRITISH SWARGIARY, ABSTRACT This study systematically investigated the communication skills of postgraduate students in India across various universities and academic disciplines

A stratified random sampling strategy was employed to select a sample of N 2000 postgraduate students from three universities. Data were collected using a self-report questionnaire assessing communication proficiency, confidence, strengths, weaknesses, and skills improvement. Additionally, participants' performance was evaluated through oral presentations, group discussions, and written communication tasks. The self-report questionnaires revealed that the majority (65-75%) perceived their overall communication proficiency as average to above average, with 40-50% expressing confidence. Strengths included clarity of expression, active listening, and adaptability, while weaknesses comprised public speaking, conflict resolution, and non-verbal communication. Approximately 60-70% believed they were effective in expressing ideas verbally and perceived improvement during postgraduate studies. Oral presentation assessments exhibited variations with University A's Science (20% excellent) and Engineering (25% excellent) disciplines performing better. Group discussion assessments highlighted nuanced differences with University A's Engineering (25% excellent) and University B's Medicine (25% excellent) disciplines excelling. Written communication assessments revealed consistent trends with 20-25% excellent ratings in Science, Engineering, Medicine, and Social Sciences disciplines. The study underscores the multifaceted nature of communication skills and the need for tailored discipline-specific training programs to enhance proficiency and contribute to academic development. The findings align with previous research emphasizing the importance of structured communication skills training for postgraduate students. Future studies could explore longitudinal impacts, comparative analyses with undergraduate students, and alternative training methods.

Exploring Communication Law Randy Bobbitt, 2015-09-25
Based on the Socratic dialogue method, *Talking about Communication Law* provides the fundamentals for discussing controversial issues in communication law and asks thought-provoking questions to promote debate. Providing the basic framework of the law with discussions focusing on the major cases in each area, *Talking about Communication Law* begins with the material related to the First Amendment's free speech and free press clauses, then proceeds through the various topics derived from those freedoms, including libel, privacy, access to information, the media, and the courts, broadcast regulation, intellectual property, and business communication. Conciseness and clear language are its strengths, as are its readability and engaging approach. Point-counterpoint essays, frequently asked questions, chapter glossaries, and case problems encourage students to take an active approach to learning and create a running dialogue with the reader. The first one-third of the book deals with the First Amendment as applied to political speech, campus issues, and sexual expression. The second one-third deals with issues in journalism, broadcasting, and cyberspace. The last one-third deals with issues related to communication in business, such as advertising, public relations, and intellectual property.
