

Small Fish

Michigan

Small Fish:

Small fish for food security and nutrition Food and Agriculture Organization of the United Nations, 2023-11-13 Food insecurity hunger and malnutrition have been on the rise in recent years due to disruptions such as the COVID 19 pandemic increasing climate shocks and conflicts Decades of steady progress to reduce food insecurity and malnutrition were often attributed to increased food production and intensification of few food staple crops and livestock however more recent focus has shifted to the role of small scale producers and the importance of diverse and nutritious foods This technical paper brings focus to the often overlooked small fish which play an integral role in the food security nutrition and livelihoods of the small scale fisherfolk who harvest process market trade and distribute small fish to communities near and far from water bodies The technical paper explores the various dimensions of the small fish food system addressing drivers scales interactions and multiple outcomes and trade offs such as that of small fish used for food versus feed Throughout the work applies a human centred perspective emphasizing how people are involved in various stages of a food system and how interactions and networks between them play a role in food system dynamics and outcomes It is also emphasizes how people play multiple roles within a food system and thus should not be narrowly defined as fishers processors or consumers The paper documents project implementation and lessons from the FAO subprogramme titled Implementing the Small Scale Fisheries Guidelines for gender equitable and climate resilient food systems and livelihoods and the SmallFishFood Ikan F3 Dried Fish Matters and Fish4Food projects led by the University of Bergen the University of Amsterdam and the University of Manitoba

Production and conservation of nutrient-rich small fish (SIS) in ponds and wetlands for nutrition security and livelihoods in South Asia Thilsted, S.H.[Author]; Wahab, M.A. (eds.)[Author], Small indigenous fish species SIS are an important source of essential macro and micronutrients that can play an important role in the elimination of malnutrition and micronutrient deficiencies in the populations of many South and Southeast Asian countries Of the 260 freshwater fish species in Bangladesh more than 140 are classified as SIS and are an integral part of the rural Bangladeshi diet As many SIS are eaten whole with organs and bones they contain high amounts of vitamins and minerals including calcium and iron and zinc Some SIS such as mola are also rich in vitamin A SIS are often cooked with vegetables and a little oil so they contribute to the food diversity of the rural poor SIS are recognized as a major animal source food group contributing to improved food and nutrition security and livelihoods of the people of South and Southeast Asia The purpose of this workshop is to bring together policy makers extension agents researchers non governmental and development organizations to share knowledge about small fish their contribution to better nutrition production technologies and strategies for wider dissemination of pond culture and wetland based production and conservation technologies The workshop is expected to generate ideas for further research and development of sustainable technologies for production management and conservation of SIS for the benefit of the people of Bangladesh as well as the South and Southeast Asian region
