

THINKING & TALKING: A STRATEGIC SMALL GROUP DISCUSSION

Talking and Thinking is a discussion strategy that uses a silent cue to communicate with the group if each person is Thinking or if they Have Something to Say. Here's how it works:

Step 1

- Put students in groups of 3-4 and give each student a T&T Card

Step 2

- Offer students a question or a prompt to discuss. One student volunteers to share first.

Step 3

- Each student in the group displays their status on the card, either that they are thinking – and don't want to talk, or that they have something to say, and want to be called on.

Step 4

- After the first student speaks, they select a student with a the Caption Bubble, "I have something to say". That student shares and then selects a new student.

Step 5

- When everyone has their I'm Thinking bubble, the group goes on to the next question or prompt.

Methods in Community-Based Participatory Research for Health Barbara A. Israel, Eugenia Eng, Amy J. Schulz, Edith A. Parker, 2005-08-19 Written by distinguished experts in the field, this book shows how researchers, practitioners, and community partners can work together to establish and maintain equitable partnerships using a Community Based Participatory Research (CBPR) approach to increase knowledge and improve health and well-being of the communities involved. CBPR is a collaborative approach to research that draws on the full range of research designs including case study, etiologic, longitudinal, experimental, and nonexperimental designs. CBPR data collection and analysis methods involve both quantitative and qualitative approaches. What distinguishes CBPR from other approaches to research is the active engagement of all partners in the process. This book provides a comprehensive and thorough presentation of CBPR study designs, specific data collection and analysis methods, and innovative partnership structures and process methods. This book informs students, practitioners, researchers, and community members about methods and applications needed to conduct CBPR in the widest range of research areas including social determinants of health, health disparities, health promotion, community interventions, disease management, health services, and environmental health.

Revolutionizing Inclusive Education: Mindfulness, Neurodiversity, and Executive Functioning Skills Efthymiou, Efthymia, 2024-08-21 The push for inclusivity has revolutionized educational practices, policies, and frameworks. Schools are no longer merely institutions that impart knowledge; they are shaping societal values, promoting social justice, and preparing students to progress. This evolution is driven by the understanding that inclusive education benefits all students, not just those with disabilities or special needs. It promotes empathy, reduces prejudice, and equips students with the skills to contribute to a complex, interconnected world. *Revolutionizing Inclusive Education: Mindfulness, Neurodiversity, and Executive Functioning Skills* explores the life-changing potential of inclusive education. With a strong emphasis on the word "revolutionizing," the book challenges traditional practices and conventional thinking in the field of inclusive education. By integrating mindfulness practices, understanding neurodiversity, and developing executive functioning skills, the book offers a fresh and innovative approach to inclusive classrooms. Covering topics such as assistive technology, neurodivergent learners, and student well-being, this book is an essential resource for academicians, researchers, school administrators, educators, preservice teachers, and more.
