Walls,1995-11-01 Thoreau was a poet a naturalist a major American writer Was he also a scientist He was Laura Dassow  
Walls suggests Her book the first to consider Thoreau as a serious and committed scientist will change the way we  
understand his accomplishment and the place of science in American culture Walls reveals that the scientific texts of Thoreau  
s day deeply influenced his best work from Walden to the Journal to the late natural history essays Here we see how just

when literature and science were splitting into the two cultures we know now Thoreau attempted to heal the growing rift Walls shows how his commitment to Alexander von Humboldt's scientific approach resulted in not only his marriage of poetry and science but also his distinctively patterned nature studies In the first critical study of his *The Dispersion of Seeds* since its publication in 1993 she exposes evidence that Thoreau was using Darwinian modes of reasoning years before the appearance of *Origin of Species* This book offers a powerful argument against the critical tradition that opposes a dry mechanistic science to a warm organic Romanticism Instead Thoreau's experience reveals the complex interaction between Romanticism and the dynamic law seeking science of its day Drawing on recent work in the theory and philosophy of science as well as literary history and theory Seeing New Worlds bridges today's two cultures in hopes of stimulating a fuller consideration of representations of nature
