**Other Half** Trevor Beeson,2011-11-30 Women have always constituted at least half of the church s membership but for  
almost 2 000 years were excluded from any significant part in its leadership After the example of Jesus the earliest Christian  
communities were wholly inclusive in their organisation but a patriarchal model derived from the pattern of the secular  
Greco Roman societies was soon adopted This restricted women to subordinate roles from which the struggle to escape  
continues However there were always some courageous and often highly talented women who sought to exercise a Christian

ministry within but usually outside the church's structures. Focusing on the Church in England Trevor Beeson provides short lives of some of these. Among them are several well known historical figures such as Hilda of Whitby but the majority of the book celebrates the accomplishments of women in the last two hundred years in religious life social reform literature and theology and above all in the ordained ministry. More than 5000 women have been ordained to the priesthood so far and in 2012 the consecration of women as bishops is likely to be authorised. Trevor Beeson reflects on the long term consequences of a momentous change in the church's life which should result in the release all its members from the restrictions of a still largely male orientated faith community

**A History of Colombian Economic Thought** Andrés

Álvarez Jimena Hurtado,2023-09-08 Ever since the quest for independence between 1810 and 1819, economic thought in Colombia has been shaped by policy debates and characterized by a pragmatic and eclectic approach. Economic thought in Colombia can only be revealed through the exploration of economists' practices and the role of economic arguments within broader public debate. This history of Colombian economic thought provides a detailed account of major issues that have marked the constant feedback between economic ideas and economic practice in Colombia during the 19th and 20th centuries. This volume is thus a history of the interaction between ideas and policy. Those involved in these debates, politicians, public officials, journalists and latterly professional economists, established direct contact with what can be identified as the centers of production of economic theory both in Europe and the US and entered regional and local networks in economics but were not just importers of ideas or theories. The way in which they read, discussed, transformed and applied economic

theories in Colombia makes for a rich environment for the production and implementation of economic policies that drew diverged and transformed the way economics was understood and used as a source of knowledge for practical concerns This is why the history of Colombian economic thought does not fit into traditional typologies of economic schools and why it must be understood as part of a political debate and within a political social and cultural context that demanded specific solutions to urgent social demands Through the study of what was taught when and how at the beginnings of the republican era and why and how professional economists came to lead public debate and economic policy making in the 20th century this book explores the foundations of this permanent interaction between theory and practice This book will be of significant interest to readers of history of economic thought economic history and the history of Colombian and Latin American economic political and social life more broadly     *The Monthly Packet of Evening Readings for Members of the English Church ,1889*     Nora Creina Hungerford,1893     The Student ,1889
