Small and medium-sized enterprises, globalization and the internet Oliver Burgis,2002-12-04 Inhaltsangabe

Abstract The last decade was characterized by mainly to major developments The first was the ongoing globalization of the markets A development that was not absolutely new in the nineties since it is already progressing since the fifties But it was in recent years when this development gained such an unprecedented momentum and dynamics which most people and enterprises were just not prepared for The second was the emerge of the Internet and the following e hype about the new economy Larry Downes named both in his much considered article Behind Porter as two of three new driving forces and influencing factors for the economic affairs of the new century And he might probably be right Although one of them suffered quite a setback at the end of the nineties when the Internet bubble finally busted But if one looks on the technological developments taking place then there is no doubt that the Internet will continue its triumphal procession Certainly in a different way as it did in the last decade And probably it will not constitute a new economy but it certainly will extremely change the old one The same is true for globalization although its effects are maybe not that obvious But the trend towards one global market is obvious The last event in that respect was probably the Peoples Republic of China entering the World Trade Organization and opening thereby up its markets for foreign enterprises Before that background and as policy makers and business people look for development paths which might take economies successfully over the next decades three of the issues which are receiving a lot of attention are What is the effect of globalization What is the role of small and medium sized enterprises What is the impact of electronic commerce the rapidly changing ways in which commercial activities may be undertaken using innovations in information technology The small and medium sized enterprises are building the backbone of the German economy These companies where responsible for the fast recovery of Germany after Second World War and since them have greatly contributed to develop Germany to the third largest economy in terms of gross national product in the world Ludwig Erhardt former German Chancellor and influential Minister of economics once described the importance of the Mittelstand for the German economy and society in a speech held in G teburg 50 years ago And his words retain their

Entrepreneurship,

Small and Medium-Sized Enterprises and the Macroeconomy Zoltan J. Acs,Bo Carlsson,Charlie Karlsson,1999 This book was originally published in 1999 At this time the US economy had recently restructured itself moving away from an industrial economy towards one based on information while the European Union and Japan were left to worry about rising government deficits inflexible businesses persistent unemployment and workers inadequately trained for the information age Why did the US economy move beyond its chief competitors This collection suggests that at least some of the answers to the pattern of divergent development can be found in the role of the entrepreneur By examining the process that entrepreneurs play in the economy the essays in this volume make a fundamental contribution to our understanding of the macroeconomy Each chapter clarifies the role of entrepreneur in economic theory the function of small and medium size enterprises that they found and build and the impact of the innovations introduced on employment productivity and economic growth

products methods and new market offers This investigation gives further help and exemplars for a successful SME management especially for the leisure time market horse management and wants to provide a scientific and experience oriented contribution to motivate young elites to carry out their business and personal targets with a sense of proportion Dr Dr Bernd Schneider is for years familiar with SME problems as a young business manager enterpriser and now as head of the study focus Entrepreneurship of an academy He teaches and advises both at home and abroad Entrepreneurship in Sub-Saharan Africa John O. Lee, 2002-09-11 This book examines how the South Korean state is able to execute national policies that are opposed to the interests of social constituents despite the expansion of social power The relationship between the government and big business provides an illuminating example of this The author demonstrates how Confucian values the role of the family and a firm hierarchical tradition have prevented South Korea from developing a modern state on the Western model **Small- and Medium-Size Enterprise Financing in Eastern Europe** Leora F. Klapper, 2016 There is currently a large interest in

understanding firms access to finance particularly in the financing of small and medium size enterprises SMEs But the financing patterns of SMEs across countries is not well understood For example little is known about the relative importance of equity debt and inter firm financing for SMEs across countries The authors use the Amadeus database which includes financial information on over 97 000 private and publicly traded firms in 15 Eastern and Central European countries The Amadeus database allows the authors the opportunity to provide a new analysis of the general financing patterns of private firms across a large sample of Eastern European countries The summary statistics show that the size of the SME sector as measured by the percentage of total employment in Eastern European countries is smaller than in most developed economies

Although the authors find in almost every country in the sample a large number of SMEs as a percentage of total firms the SMEs in Eastern Europe are generally small and hire few employees. However SMEs seem to constitute the most dynamic sector of the Eastern European economies relative to large firms. In general the SME sector comprises relatively younger, more highly leveraged and more profitable and faster growing firms. This suggests that a new type of firm is emerging in transition economies that is more market and profit oriented. But at the same time these firms appear to have financial constraints that impede their access to long term financing and ability to grow. This paper, a product of Finance Development Research Group is part of a larger effort in the group to better understand small and medium size enterprise financing.

The Promotion of Small and Medium-sized Enterprises in Europe Council of Europe, 1994 [Motivating SMEs to Cooperate and Internationalize](#) George Tesar, Zsuzsanna Vincze, 2017-09-18 Interest in generally expanding the understanding of small and medium sized enterprises especially understanding their strategies and operations to enter international markets is growing rapidly among researchers and academics globally. Government officials, regional and economic specialists and international trade advisers are directly involved in assisting small and medium sized enterprises in developing their international marketing expertise. Motivating SMEs to Cooperate and Internationalize consists of research studies, cases and experiences obtained by researchers and academics from managers of small and medium sized enterprises in Northern Europe as they worked closely with managers on issues and problems leading to internationalization of enterprises. This book will map not only the attempts of small and medium sized enterprises in Northern Europe to enter foreign markets but also to understand how researchers and academics can help small and medium sized Northern European enterprises achieve their objectives. This compilation of approaches, perspectives and experiences will serve as a resource tool for researchers and academics active in international management training programs worldwide and help illustrate how to close the gap between publishing results of their findings and efforts to disseminate their findings among managers of small and medium sized enterprises in their domains. This book is the first attempt to integrate results of research studies and practices as an illustration of how knowledge of small and medium sized enterprises has evolved since the 1980s with the contributions of individual researchers and academics in Northern Europe. It will be of relevance to academics and researchers interested in working closely with small and medium sized enterprises to meet their goals in entering international markets.

Influence of Socio-Economic Environment on the Development of Small and Medium-Sized Enterprises Anna Iwona Adamik, Agnieszka Zakrzewska, Marek Matejun, 2011 *Industrial Relations in Small and Medium-sized Enterprises* Peter Auer, Helga Fehr-Duda, 1989 This study explores the industrial relations systems in small and medium sized enterprises hereafter SME in five EEC member countries France, the Federal Republic of Germany, Italy, Spain and the United Kingdom and in one non member country Austria. Although it also describes some of the more important labor law regulations which affect industrial relations in SMEs its main focus is on the outcome of laws and other regulations. For a

more comprehensive discussion of the legal environment of industrial relations in SMEs we refer to the study undertaken for the Commission by the Fondazione Giulio Pastore 1986 on Labor Law and Industrial Relations in SMEs
