Smart Globalization:

Smart Globalization Andrew Smith, Dimitry Anastakis, 2014-02-24 Today's globalization debates pit neoliberals who favour even deeper integration into the global economy against neo mercantilists who call for a relatively selective approach to globalization and the return to more interventionist industrial policies. Both sides claim to have the facts on their side. Inspired by the work of economists Ha Joon Chang and Dani Rodrik, editors Andrew Smith and Dimitry Anastakis bring together essays from both historians and economists in this collection to test claims that wealth comes from either protectionism or free trade. With empirical research that spans more than a century of Canadian history, Smart Globalization demonstrates that Canada's success stemmed neither from complete openness to globalization or policies of isolation and self sufficiency.

Smart Globalization Anil K. Gupta, 2003-02-28 Smart Globalization is a compendium of leading edge thinking on global strategy first published in the acclaimed MIT Sloan Management Review. The central premise underlying this book is that globalization can be a double edged sword. The global or globalizing firm has the potential to reap several types of benefits such as the vast potential of a much larger market arena, opportunities to capture scale and location based cost efficiencies and exposure to a multiplicity of new product and process ideas. However, globalization also exposes the firm to numerous strategic and organizational challenges emanating from a dramatic increase in diversity, complexity and uncertainty external as well as internal to the firm. How managers address these challenges determines whether globalization yields competitive advantage or disadvantage and makes the company stronger or weaker. Smart globalization is the ability to capture the benefits and minimize the costs and risks. Smart Globalization's expert contributors³ leaders in the design of winning global strategies and in the creation of effective global networks³ include David J. Arnold, Christopher A. Bartlett, Julian M. Birkinshaw, J. Stewart Black, Joseph N. Fry, Sumantra Ghoshal, Vijay Govindarajan, Hal B. Gregersen, Anil K. Gupta, Stuart L. Hart, W. Chan Kim, Bruce Kogut, David L. Levy, Renée A. Mauborgne, Allen J. Morrison, Mark B. Milstein, Das Narayandas, John A. Quelch, Gordon Swartz, Stephen E. Weiss and George S. Yip.

The Rise Of The New Economic Powers And The Changing Global Landscape Haico Ebbers, 2022-12-19 This book explores the catching up process of a group of large emerging markets the New Economic Powers. This process is extremely robust and should be considered

as the defining trend of our age resulting in a pivotal change in world economics and politics The outcome is that the West cannot dominate the world as it did in the previous 200 years Today s world is pluralistic and the larger emerging markets are becoming increasingly influential That is the new reality which at times caused and will cause further discomfort and uncertainty in the West In the eight chapters the viewpoints on globalization of nine New Economic Powers are discussed Each chapter is an essential element in understanding the process of globalization and the role the New Economic Powers play in it Essentially their views are guided by a fundamental different look about the role of the market and the government in society compared to what we see in the West The New Economic Powers understand the power of the market to create prosperity but at the same time emphasize the need for government interference This delicate balance is particularly visible with respect to their international trade and investment policies which bring them in conflict with Western countries and multilateral institutions such as the WTO and the IMF The book helps the reader to understand the fundamental choices made by policymakers in the New Economic Powers **Roadmapping Future** Tuğrul U. Daim,2021-03-16 This volume presents a portfolio of cases and applications on technology roadmapping TRM for products and services It provides a brief overview on criteria or metrics used for evaluating the success level of TRM and then offers six case examples from sectors such as transportation smart technologies and household electronics A new innovation in this book is a section of detailed technology roadmap samples that technology managers can apply to emerging technologies **Globalization** Robert Goehlert,2003

Foundations of the American Century Inderjeet Parmar,2012-03-20 Inderjeet Parmar reveals the complex interrelations shared mindsets and collaborative efforts of influential public and private organizations in the building of American hegemony Focusing on the involvement of the Ford Rockefeller and Carnegie foundations in U S foreign affairs Parmar traces the transformation of America from an isolationist nation into the world s only superpower all in the name of benevolent stewardship Parmar begins in the 1920s with the establishment of these foundations and their system of top down elitist scientific giving which focused more on managing social political and economic change than on solving modern society s structural problems Consulting rare documents and other archival materials he recounts how the American intellectuals academics and policy makers affiliated with these organizations institutionalized such elitism which then bled into the machinery of U S foreign policy and became regarded as the essence of modernity America hoped to replace Britain in the role of global hegemon and created the necessary political ideological military and institutional capacity to do so yet far from being objective the Ford Rockefeller and Carnegie foundations often advanced U S interests at the expense of other nations Incorporating case studies of American philanthropy in Nigeria Chile and Indonesia Parmar boldly exposes the knowledge networks underwriting American dominance in the twentieth century **Capitalism at the Crossroads** Stuart L.
