Testing Monetarism Meghnad Desai, 2013-11-07 Testing Monetarism pursues the complex question of the nature of the controversy surrounding monetarist theory and evidence and the reasons for the persistence of this controversy. The theory of monetarism is examined in its old guise as the Quantity Theory of Money and subsequent chapters look at the evolution of the theory to its present form in the period since the 1950s and Desai weaves together issues of theory with those of econometric evidence. He looks in turn at major predictions of monetarism critically examining the claims made in the literature in the light of his discussion of the methodology of testing theories and highlights flaws in the empirical data surrounding monetarism.

*The Monetarists* George S. Tavlas, 2023-06-01 An essential origin story of modern society's most influential economic doctrine. The Chicago School of economic thought has been subject to endless generalizations and mischaracterizations in contemporary debate. What is often portrayed as a monolithic obsession with markets is in fact a nuanced set of economic theories born from decades of research and debate. *The Monetarists* is a deeply researched history of the monetary policies and personalities that codified the Chicago School of monetary thought from the 1930s through the 1960s. These policies can be characterized broadly as monetarism—the belief that prices and interest rates can be kept stable by controlling the amount of money in circulation. As economist George S. Tavlas makes clear, these ideas were more than just the legacy of Milton Friedman; they were a tradition in theory brought forth by a crucible of minds and debates throughout campus. Through unprecedented mining of archival material, *The Monetarists* offers the first complete history of one of the twentieth century's most formative intellectual periods and places. It promises to elevate our understanding of this doctrine and its origins for generations to come.

In addition nine major entries cover each of the major disciplines political economy, management and business, human geography, politics, sociology, law, psychology, organizational behavior and the history and development of the social sciences in a broader sense.
